### **Steel Structures, PPR-20-5**

Please accept the following comments from El Paso County Public Health regarding the project referenced above:

- Water and wastewater services will be provided by Woodmoor Water and Sanitation District. There is a finding for sufficiency in terms of water quality from this Colorado Department of Public Health and Environment (CDPHE) approved district. The CDPHE has assigned PWSID# CO0121950 to the District.
- Earthmoving activity in excess of one acre, but less than twenty-five acres, requires a local Construction Activity Permit from El Paso County Public Health. Go to <https://www.elpasocountyhealth.org/service/air-quality/construction-activity-application> for more information.
- The water quality basins must have mosquito control responsibilities included as a part of the construction design and maintenance plan to help control mosquito breeding habitat and minimize the potential for West Nile Virus.
- Radon resistant construction building techniques/practices are encouraged in this area. The EPA has determined that Colorado, and specifically the El Paso County area, have higher radon levels than other areas of the country.
