Verizon Wireless proposes to locate on the above referenced approved CMRS location. The location will provide improved signal and additional capacity to the area and Colorado Spring residents, as represented with the coverage maps for the approved tower location that was previously submitted. This does not propose any new roads or structures and will utilize the approved facility and does not adjust the size of the parcel. Should you have questions or require additional information, please do not hesitate to contact me. Please see attached drawings for details.

Thank you,

Mark Paiz
