Traffic Engineer's Statement

The attached traffic report and supporting information were prepared under my responsible charge and they comport with the standard of care. So far as is consistent with the standard of care, said report was prepared in general performance with the criteria established by the County for traffic reports.

A handwritten signature of Scott D. Barnhart, which also serves as a professional seal. The seal contains the text "COLORADO REGISTERED ENGINEER" around a central emblem, and "PROFESSIONAL ENGINEER #37447" below it.

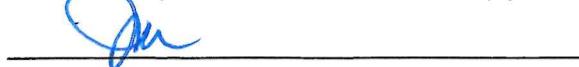

Scott D. Barnhart

Introduction

The Village at Lorson Ranch project (project) is an 9.725 -acre development located at the northeast corner of Marksheffel Road/Fontaine Boulevard in El Paso County. The project consists of a gas station/convenience store, three fast food restaurants, a daycare facility, and a storage facility.

The project is bounded on the east by Carriage Meadows Drive, on the west by Marksheffel Road, and on the south by Fontaine Boulevard. Three access points are designated for the project. One full movement access point located on Carriage Meadows Drive, a Right-IN (RI) only access on Fontaine Boulevard and a Right-In-Right-Out (RIRO) access on Marksheffel Road.

The purpose of this traffic impact study is to assess the effects this proposed development will have on the surrounding transportation system.

The report is organized as follows:

- ***Introduction*** – Describes the purpose and intent of this study.
- ***Area Conditions*** – Describes the study area land uses as well as the existing and future roadway network.
- ***Proposed Development*** – Describes the proposed development and the location.
- ***Projected Traffic*** – Identifies the expected number of daily trips that will be generated by the Village at Lorson Ranch development. The expected external trip distribution is also shown.
- ***Traffic Analysis*** – Analyzes the existing conditions in the study area as well as buildout year (2030) and horizon year (2045) conditions both with and without the project.
- ***Findings and Conclusions*** – Identifies any deficiencies in the study area roadway network with or without the project and mitigation measures that will alleviate any identified deficiencies.
- ***Recommendations*** – Provides a summary of the study findings.

Please include a discussion of the deviation request that has been made with the County as part of SF248.

A discussion has been added to the report explaining the requested deviation.

Area Conditions

This section describes the existing conditions and the planned level of improvements adjacent to the Village at Lorson Ranch development.

Site Accessibility

The existing roadway system consists of the following transportation facilities:

Marksheffel Road is a north-south transportation facility and is a three-lane facility. This roadway is classified as a 4-lane Expressway in the El Paso County 2040 Major Transportation Corridor Plan (MTCP). The daily traffic capacity is 48,000 ADT. Marksheffel Road provides a paved shoulder to accommodate cyclists. The City of Colorado Springs Major Throughfare Plan classifies this road as a principal arterial with a daily traffic capacity of up to 25,000 ADT for a 4-lane Principal Arterial or 60,000 ADT for a 6-lane Principal Arterial. The City of Colorado Springs has recently taken over the ownership and maintenance of this roadway.

Fontaine Boulevard is an east-west facility classified as a 4-lane Principal Arterial in the 2040 MTCP. The daily traffic capacity is 40,000 ADT. Fontaine Boulevard is currently providing 2 lanes in each direction and a paved shoulder to accommodate cyclists. The City of Colorado Springs also classified this road as a principal arterial.

Carriage Meadows Drive is a north-south local street. This facility provides one lane in each direction. Sidewalk, curb, and gutter are provided on both sides of the road. The posted speed limit is 25 mph and ADT threshold capacity is 3,000 vehicles. As a local road, it does not appear on the County's 2040 MTCP or 2060 Corridor Preservation Plan.

The study area is rapidly growing, and multiple large-scale developments are planning to be built in the future in the vicinity of the project. Specifically, Rolling Meadows/Bull Hill, Bradley Heights, Hillside at Lorson Ranch, and Corvallis. In this memo, Matrix used the *Hillside at Lorson Ranch TIS* (June 30, 2022) for the future background volumes except for the through volumes on Marksheffel Road in the buildup year. For this purpose, collected counts and an appropriate growth factor was used to represent a realistic future condition. Traffic counts were collected on March 12, 2024, to analyze the existing and future conditions. Existing counts can be found in Appendix A – Existing Conditions Analysis. Excerpts of the *Hillside at Lorson Ranch TIS* can be found in Appendix F – Supporting Documents.

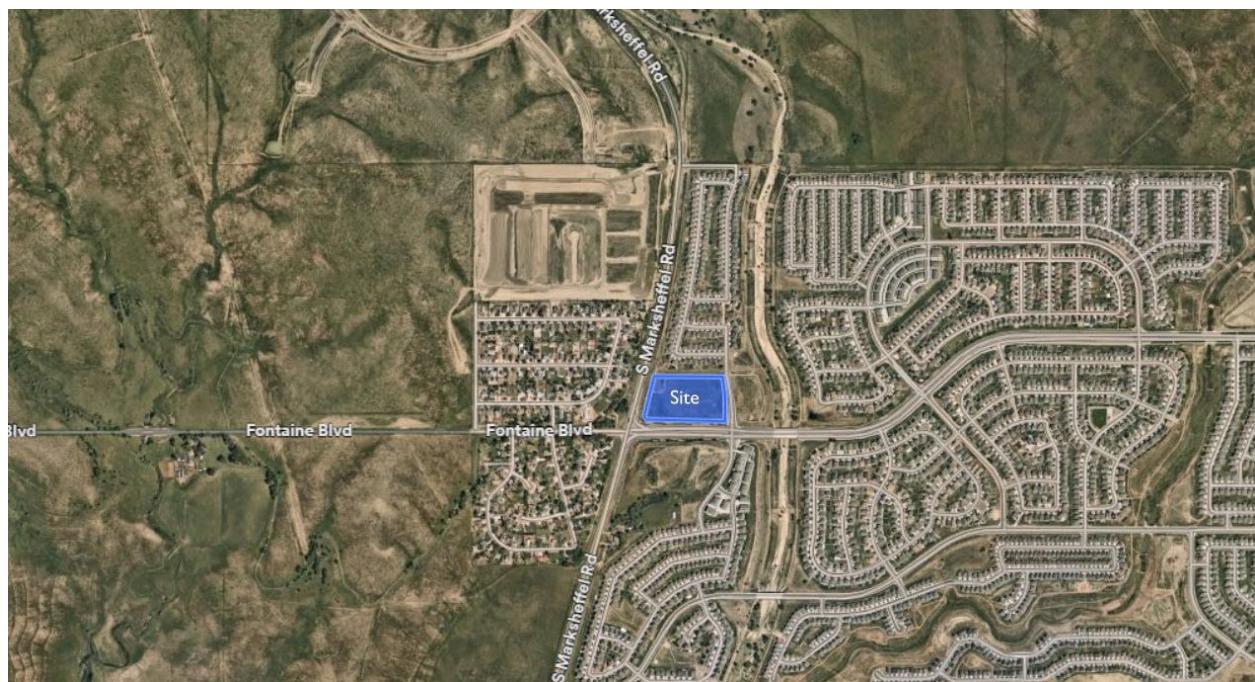

Intersection analysis for the existing conditions were confined to the intersections listed below

- Marksheffel Road/Fontaine Boulevard
- Marksheffel Road/Lorson Boulevard
- Fontaine Boulevard/Carriage Meadows Drive

The vicinity map is shown in Figure 1. Site plan is shown in Figure 2. The AM and PM peak hour volumes at the studied intersections are shown in Figure 3 and Figure 4 and the daily traffic volumes in the existing conditions are shown in Figure 5

Please include a discussion of any impacts on neighborhood schools

Discussion added.

Figure 1. Vicinity Map

Proposed Development

The Project will consist of a gas station/convenience store, three fast food restaurants, a day care and a storage facility. Figure 2 illustrates the Project site plan.

Figure 2. Village at Lorson Ranch Site Plan

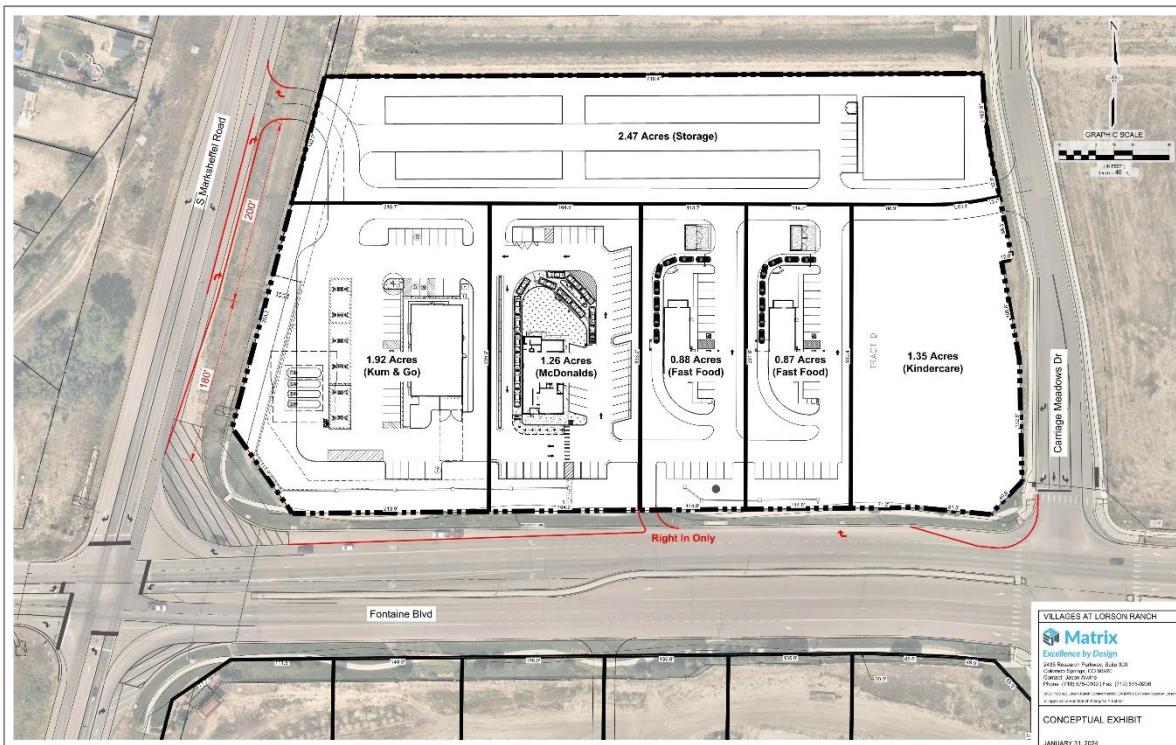

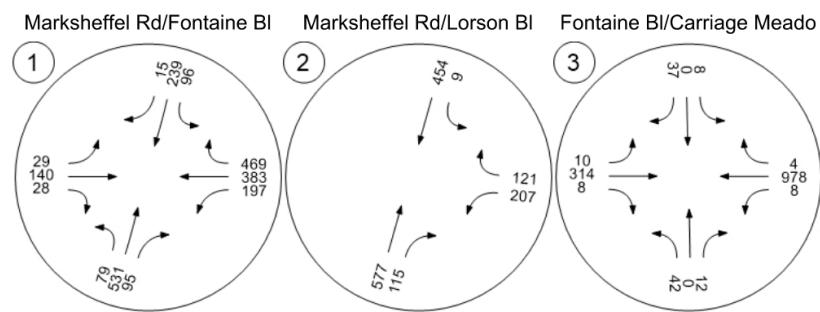

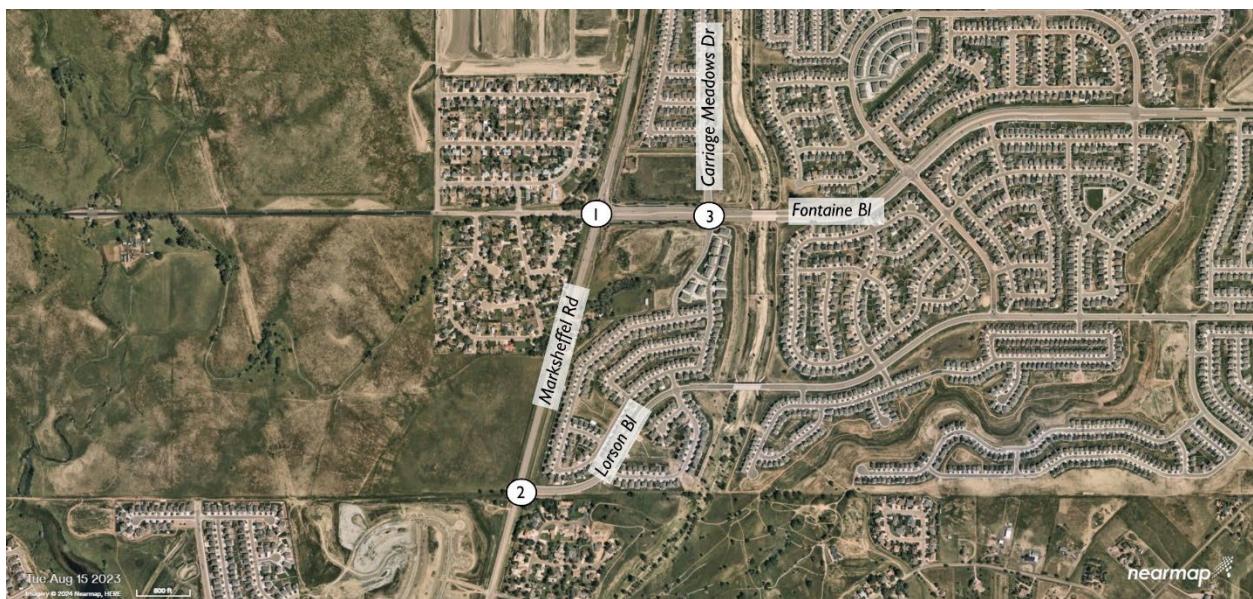

Figure 3. Existing Conditions Traffic Volumes (AM Peak Hour)

Figure 4. Existing Conditions Traffic Volumes (PM Peak Hour)

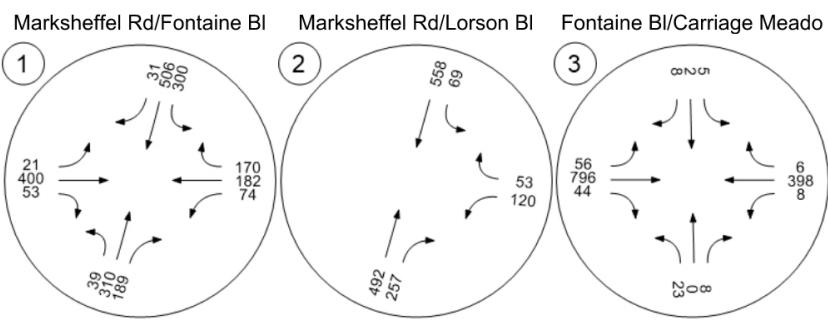

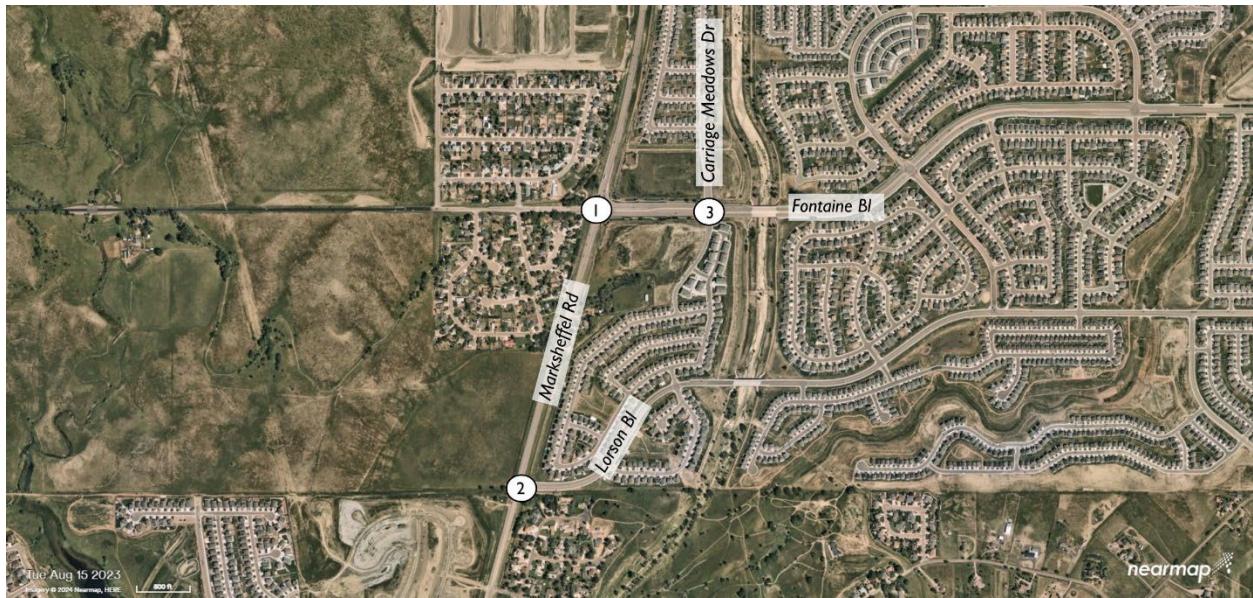

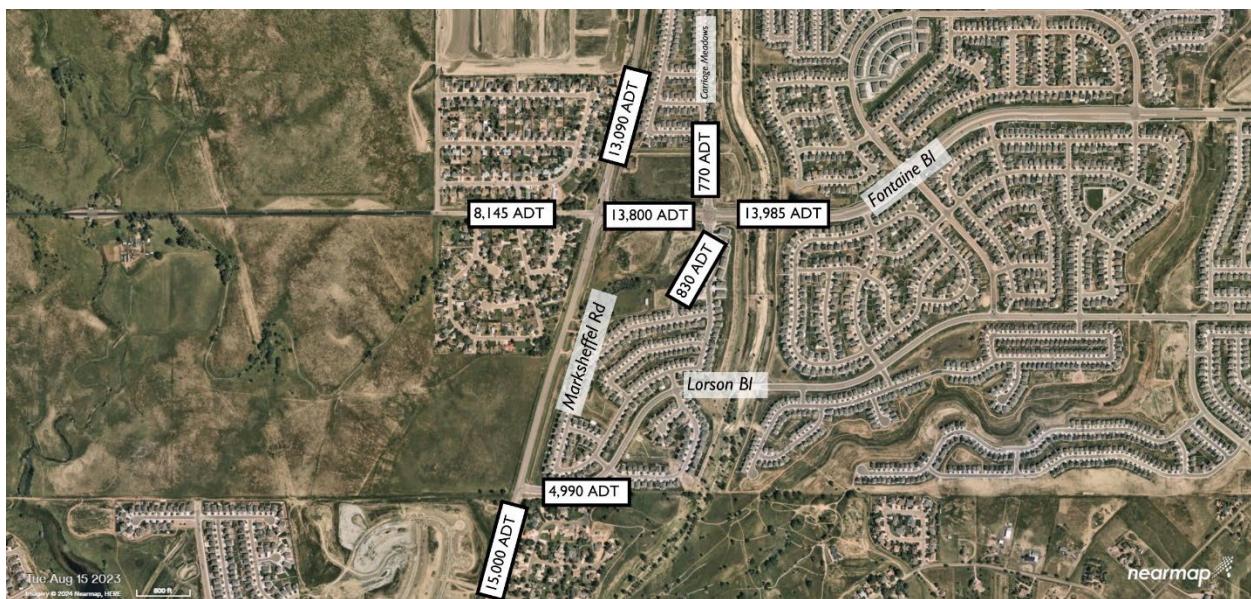

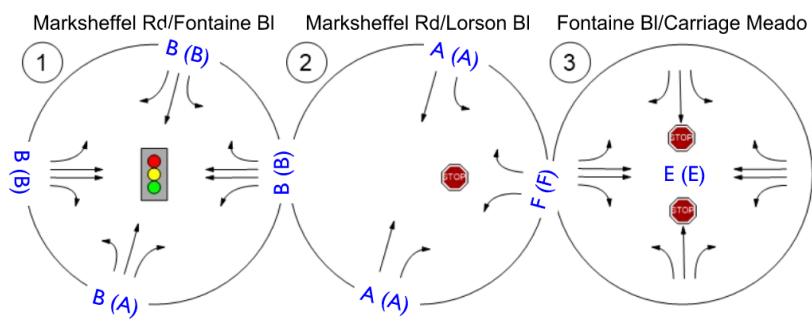

Figure 5. Existing Conditions Daily Traffic Volumes

The existing intersection configurations are shown in Figure 6.

Figure 6. Existing Conditions Intersection Configurations and LOS

Intersection LOS analysis was performed for the study area intersections and the results are shown in Table 1 and Table 2. The intersections along Marksheffel Road were studied based on the City of Colorado Springs Traffic Criteria Manual (TCM), and the remaining intersection was studied based on the El Paso County Engineering Criteria Manual (ECM).

Table 1. Existing Conditions Intersection Operations (AM Peak Hour)

Intersection Analysis Summary

ID	Intersection Name	Control Type	Method	Worst Mvmt	V/C	Delay (s/veh)	LOS
1	Marksheffel Rd/Fontaine Bl	Signalized	HCM 7th Edition	WB Left	0.521	14.4	B
2	Marksheffel Rd/Lorson Bl	Two-way stop	HCM 7th Edition	WB Left	1.247	195.0	F
3	Fontaine Bl/Carriage Meadows Dr	Two-way stop	HCM 7th Edition	SB Left	0.095	42.7	E

V/C, Delay, LOS: For two-way stop, these values are taken from the movement with the worst (highest) delay value. For all other control types, they are taken for the whole intersection.

Table 2. Existing Conditions Intersection Operations (PM Peak Hour)

Intersection Analysis Summary

ID	Intersection Name	Control Type	Method	Worst Mvmt	V/C	Delay (s/veh)	LOS
1	Marksheffel Rd/Fontaine Bl	Signalized	HCM 7th Edition	WB Left	0.458	13.1	B
2	Marksheffel Rd/Lorson Bl	Two-way stop	HCM 7th Edition	WB Left	0.859	92.7	F
3	Fontaine Bl/Carriage Meadows Dr	Two-way stop	HCM 7th Edition	NB Left	0.239	46.7	E

V/C, Delay, LOS: For two-way stop, these values are taken from the movement with the worst (highest) delay value. For all other control types, they are taken for the whole intersection.

Table 1 and Table 2 indicate two intersections operate below the acceptable LOS. Acceptable operations per the El Paso County ECM are defined as any intersection that operates at LOS D or better. The City of Colorado Springs TCM requires all intersection approaches operate at LOS D or better.

The intersection of Marksheffel Road/Lorson Boulevard (#2) operates at LOS F during both AM and PM peak hours. The City of Colorado Springs currently plans to install a traffic signal at this intersection. By changing the traffic control type, this intersection will operate at LOS B in both AM and PM peak. All approaches will also operate at LOS B. The intersection operations after changing the control type to signalized is labeled as "Mitigated" in Appendix B – Existing Conditions Analyses.

In addition, Fontaine Boulevard/Carriage Meadows (#3) operates at LOS E in both peak hours. This is due to the deficient southbound left-turn movement in AM peak, and the deficient northbound left-turn movement in the PM peak hour. Both movements' LOS are at LOS E in the existing conditions. However, Matrix Design Group

the 95-percentile queue length is less than 1.42 vehicles at any time. As a result, Matrix does not recommend any mitigations for this intersection in the existing conditions.

Turn lane evaluations were done based on the City of Colorado Springs (CCS) TCM and El Paso County (EPC) ECM and results are summarized in Table 3, below.

Table 3. Existing Conditions Turn Lane Evaluations

ID	Intersection	Control Type	Movement	Speed (mph)	Turning Volume	Queue (ft)	Agency	Deceleration (ft)	Taper (ft)	Storage (ft)	Total (ft)	Provided (ft)	Improvement (ft)

Marksheffel Road/Fontaine Boulevard (#1)

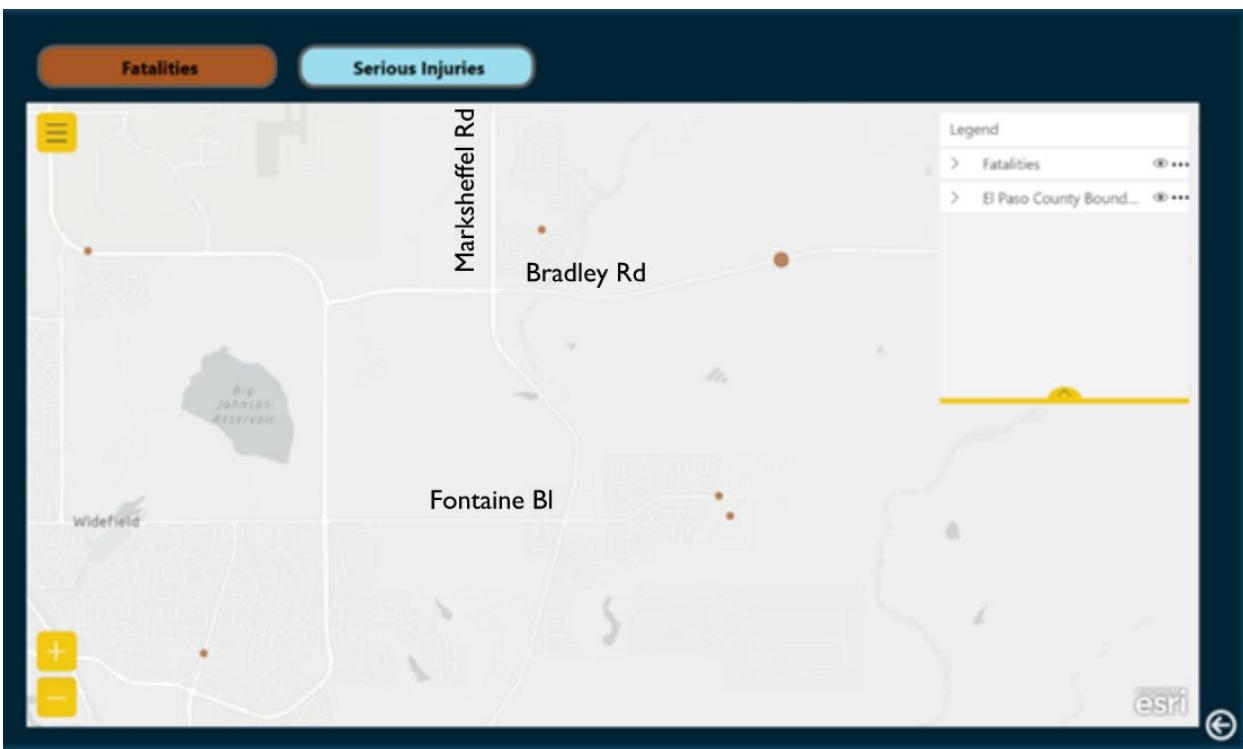

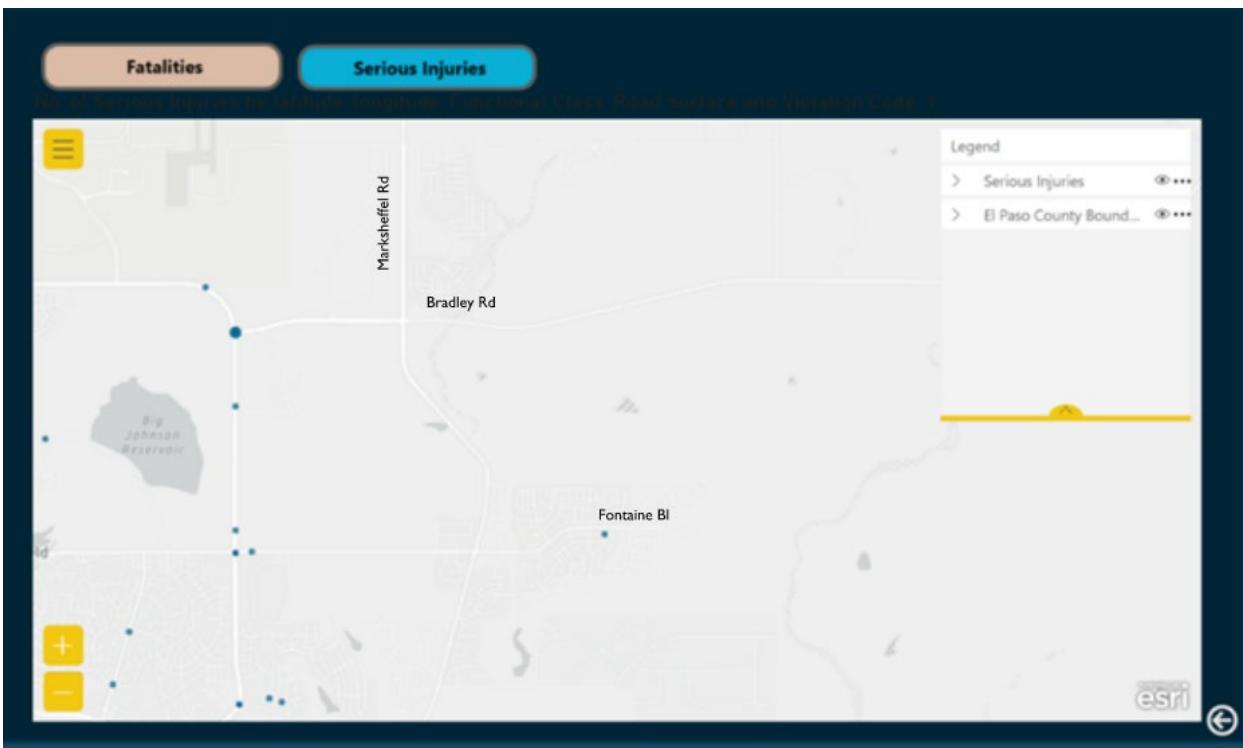

- A 210-ft extension of eastbound right-turn.

Marksheffel Road/Lorson Boulevard (#2)

- A traffic signal.

Crash History

The El Paso County Road Safety Plan website was used to obtain the number of fatal and severe crashes in the vicinity of the project. Crash data from the year 2015 to 2019 were collected and shown as a density map on the website. As shown in Figure 7 and Figure 8, two fatal crashes occurred near the project at two locations, while one serious injury crash was reported. The project will help to improve safety by contributing to installation of a traffic signal and reducing the probability of conflicting movements at the intersection of Carriage Meadows/Fontaine Boulevard.

Figure 7. Fatality Crash Map**Figure 8.** Serious Injury Crash Map

Projected Development Traffic

This section documents how much traffic the project development is expected to generate and how the external site trips will be distributed on the adjacent roadway network.

Trip Generation

The vehicle trips associated with the project were calculated using the Institute of Transportation Engineers (ITE) *Trip Generation Manual, 11th Edition*. This methodology consists of choosing an independent variable for the land use for a particular time of day. The independent variable correlates to the variation in trip ends and is related to the land use. The value of the independent variable is either multiplied by a weighted average or used in a regression equation to calculate the trips generated by the land use. The *ITE Trip Generation Manual* provides guidance on when to use the weighted average versus the regression equation.

Table 4 shows the trips that are expected to be generated by Village at Lorson Ranch at buildout. It was assumed that 100% of trips will be made by personal vehicles and no public transit use was assumed for this development as there is no transit service in the area.

In add report. Meado will be the bu Also, if corner develo and th – Site Suppo

The average trip rates have been added to the report. Please note that trip reduction was performed for the AM and PM peak hour (only for the north area). Please see Appendix C - Trip Generation for more information.

ch, trips from two future adjacent developments were included in this land located at the northeast corner of Fontaine Boulevard/Carriage at 50 dwelling units of single family attached housings (townhomes) 0 (buildout year) at this location. The townhomes traffic is included in

Ranch Commercial South (LRCS) will be constructed at the southeast the Boulevard by the year 2045 (horizon year). The traffic from this zon background scenario was assumed that the LRCS will be retail io (FAR) that is planned for the Village at Lorson Ranch (see Figure 2 the LRCS. A land use plan for the LRCS can be found in Appendix F –

Please include the trip generation rate from the ITE in the table

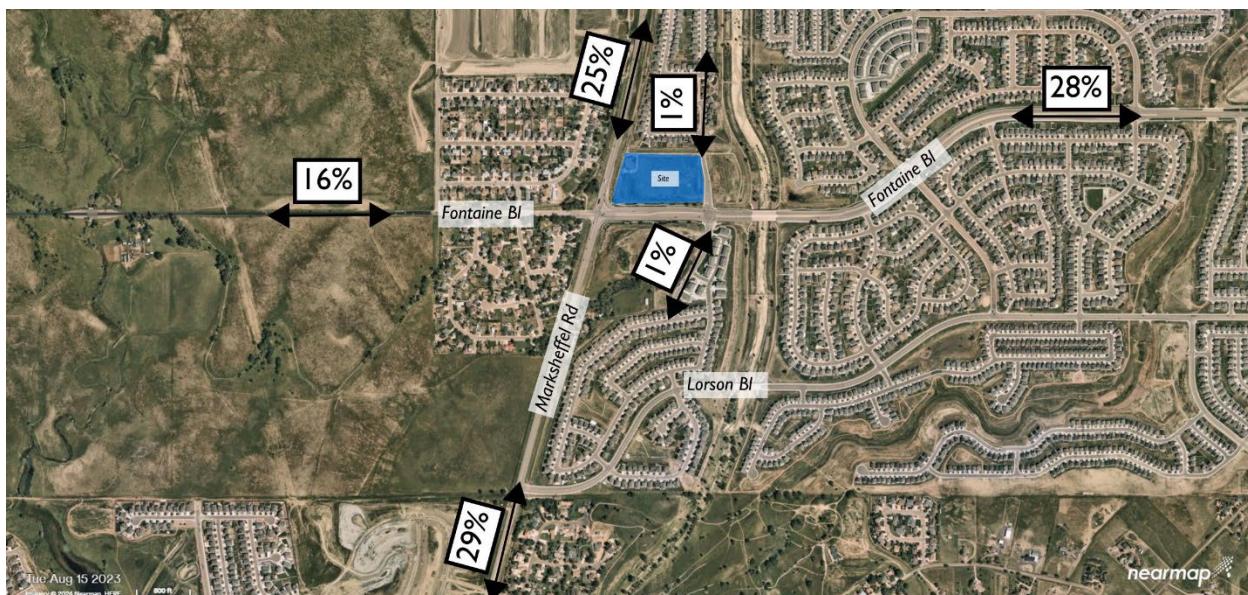

Table 4. Village at Lorson Ranch Trip Generation

Trip Distribution

Figure 9 illustrates the expected external distribution of travel for the site-generated trips. This distribution was determined by reviewing current traffic volumes and trip distributions of surrounding developments.

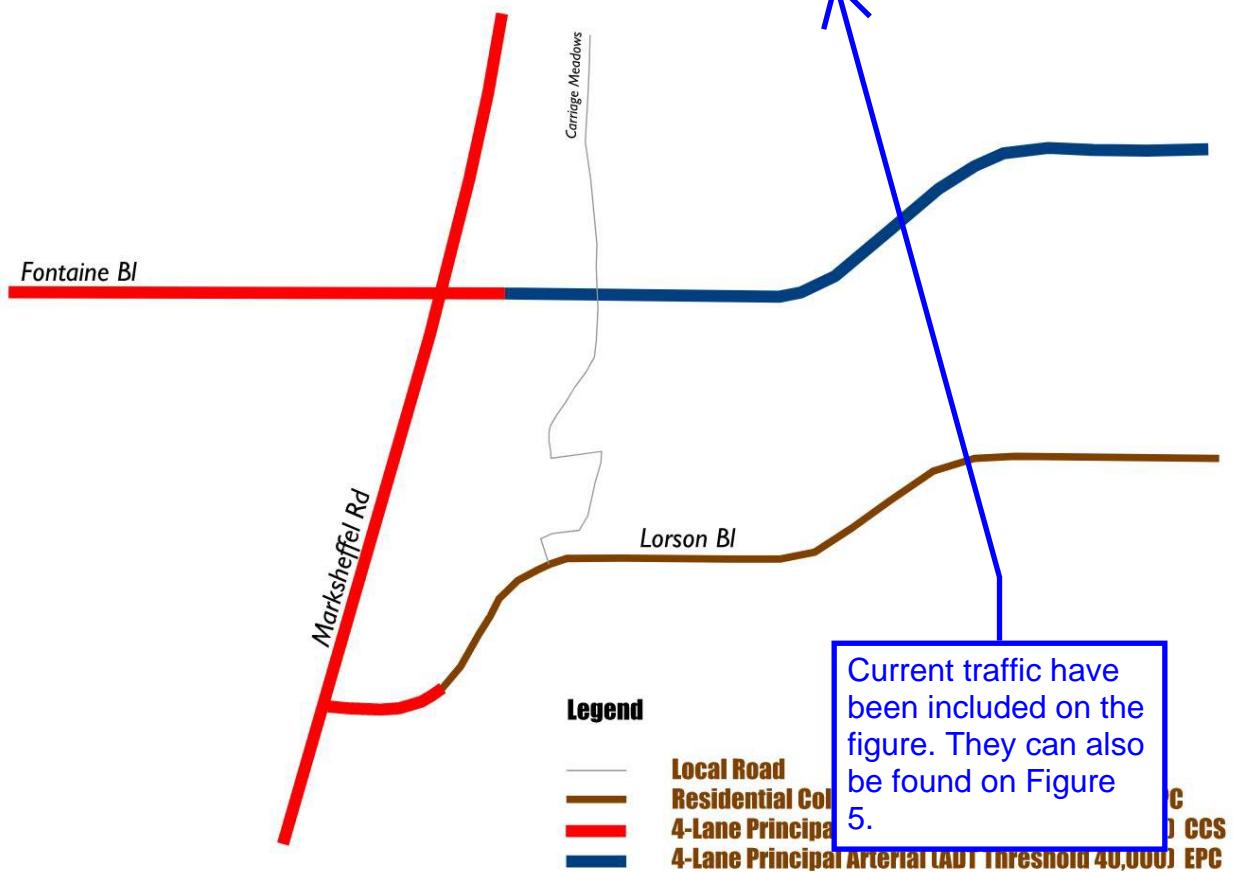

Figure 9. Trip Distribution

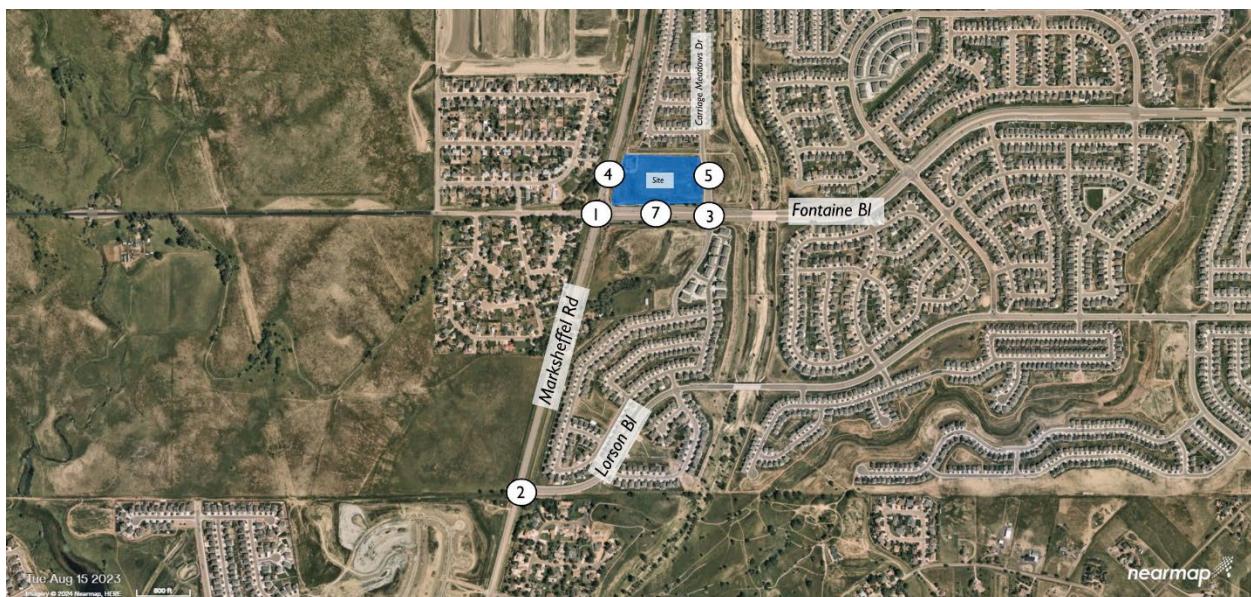

Roadways adjacent to the new development were classified based on the 2040 Major Transportation Corridor Plan (EPC), or the City of Colorado Springs Major Throughfare Plan (CCS) for the existing conditions and are shown in Figure 10. For the future conditions, Matrix classified the transportation network based on the estimated ADT.

Figure 10. Roadway Classification

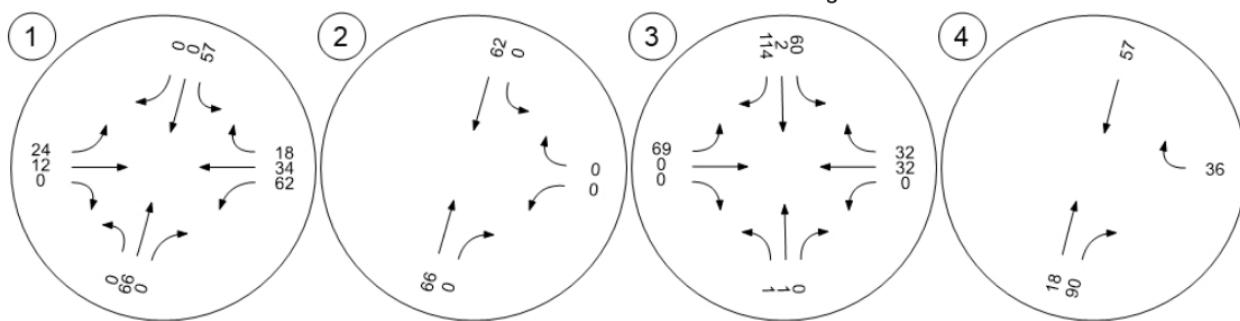

Include current traffic volume on the figure

The project trips in AM and PM peak hours are shown in Figure 11 and Figure 12 . The daily site trips are shown in Figure 13.

Traffic Analysis

Traffic conditions without the project for the buildout year (2030) and horizon year (2045) conditions were studied in this report and the results are documented as follows.

Buildout (2030) Background Conditions

The buildout year traffic volumes without the project are shown in Figure 14, and Figure 15 for the AM and PM peak hours, respectively. The daily traffic volumes and roadway classifications are shown in Figure 16.

The background traffic was derived from the *Hillside at Lorson Ranch TIS* (2022) with one exception. The through traffic on Marksheffel Road seemed underestimated in the TIS. As a result, we compared two collected counts, one collected in 2021 and one collected in 2024 at Marksheffel Road south of Fontaine Boulevard to obtain the annual growth rate at this segment. This segment experiences a 2.59% annual growth according to our collected counts. Therefore, the growth factor for the year 2030 and the year 2045 were equal to 1.166 and 1.712, respectively. The previous (2021) data collection on Marksheffel Road can be found in Appendix F – Supporting Documents.

Finally, the traffic from the townhomes at the northeast corner of Fontaine Boulevard/Carriage Meadows were added to the 2030 background conditions.

Figure 14. Buildout (2030) Background Traffic Volumes (AM Peak Hour)

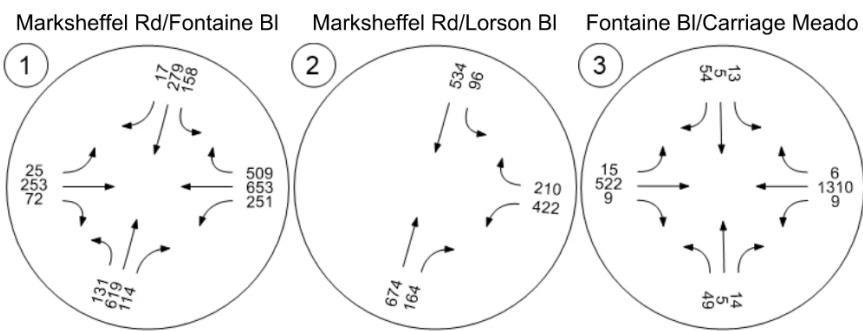

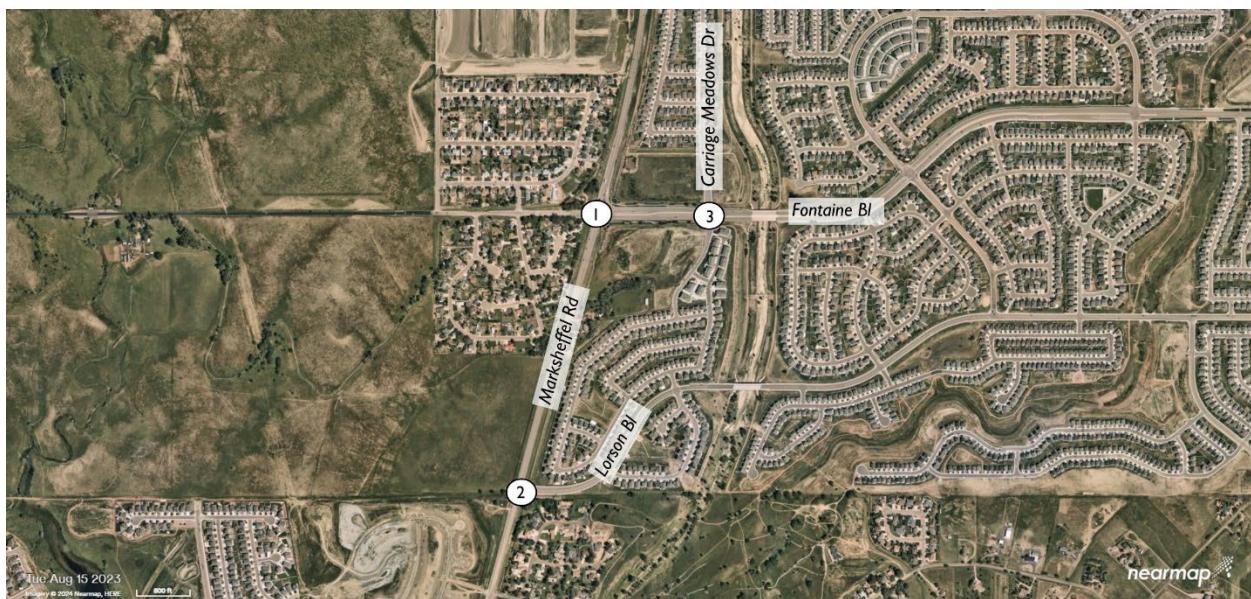

Figure 15. Buildout (2030) Background Traffic Volumes (PM Peak Hour)

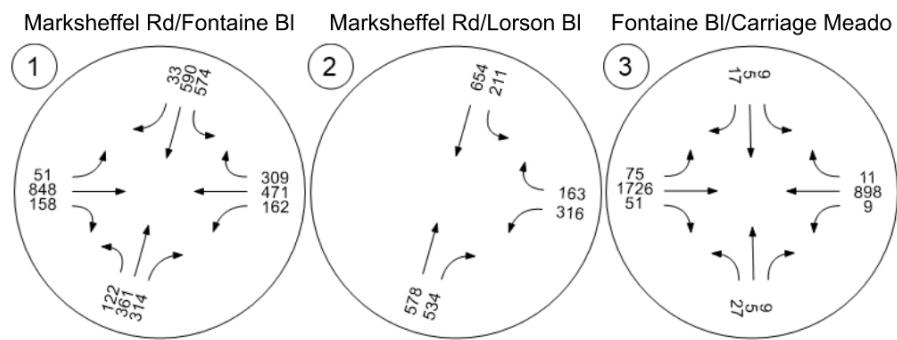

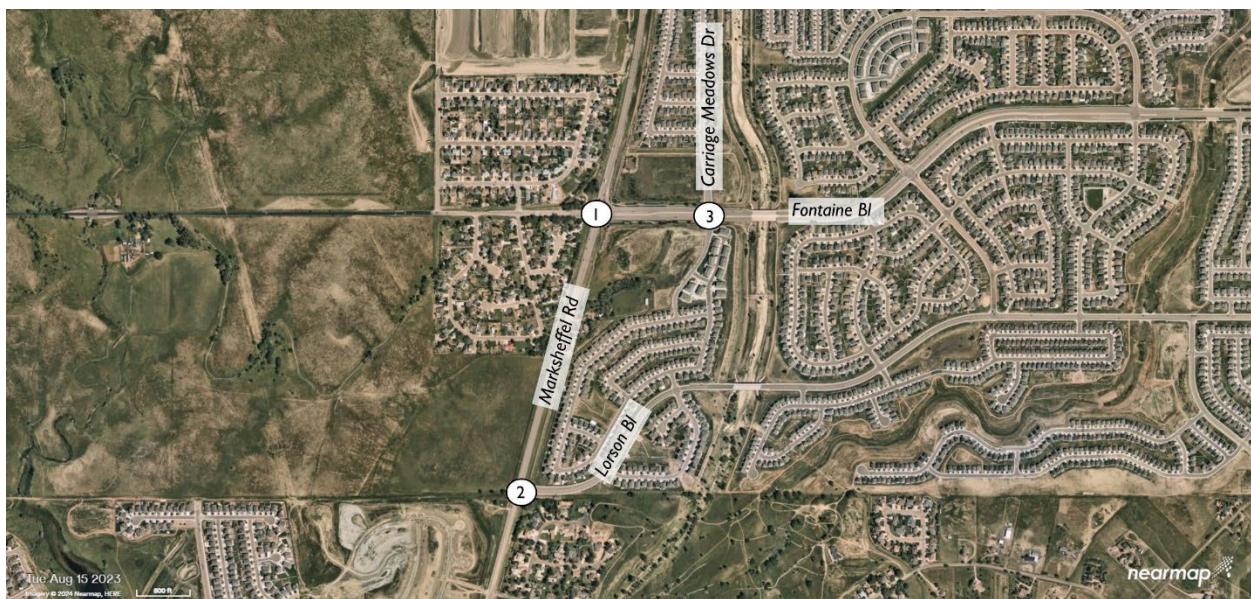

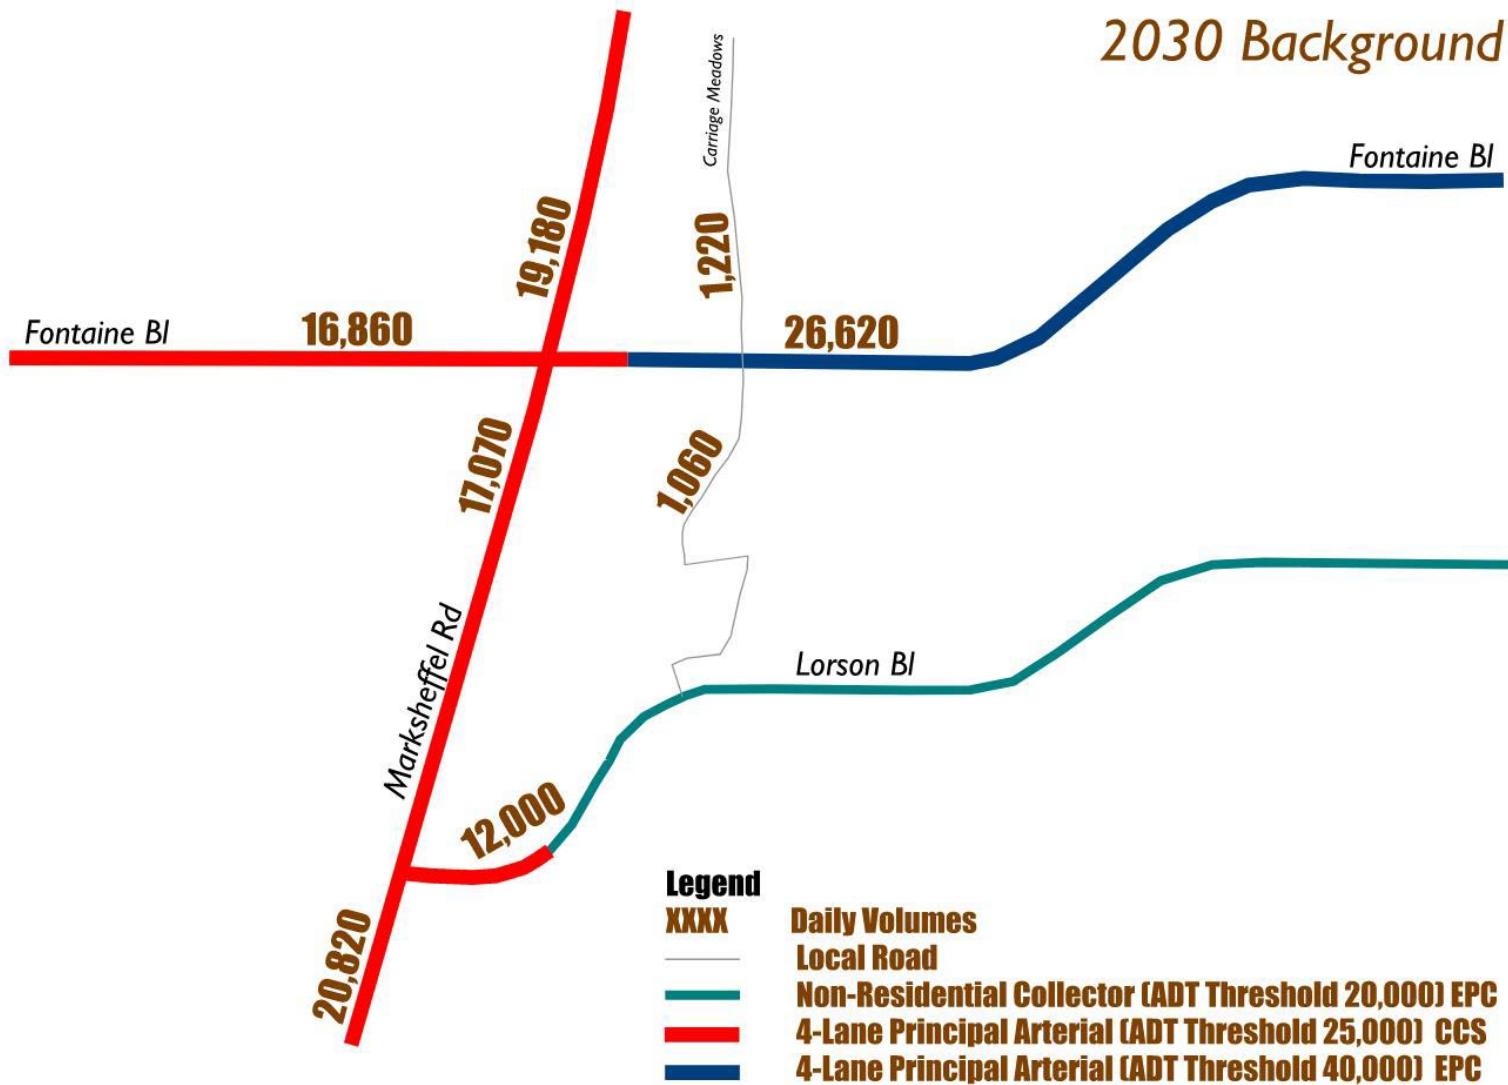

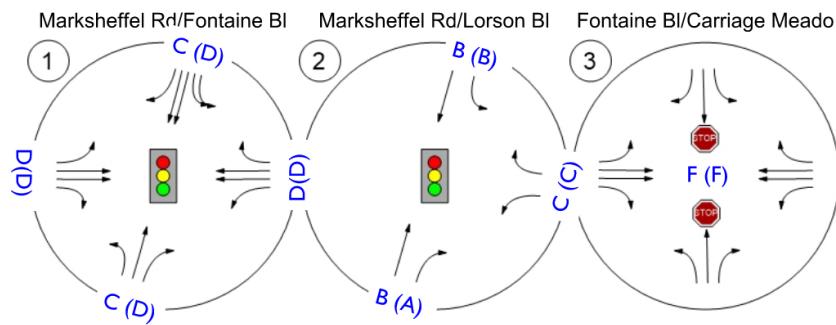

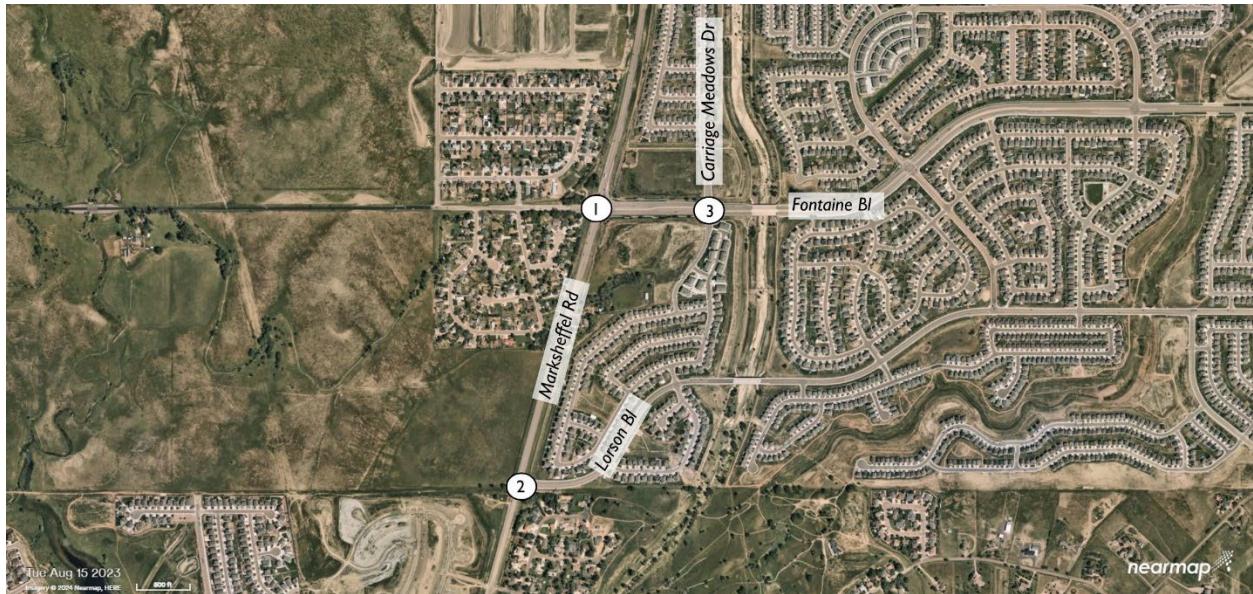

Figure 16. Buildout (2030) Background Daily Traffic Volumes and Roadway Classification

The intersection configuration and level of service are shown in Figure 17.

Figure 17. Buildout (2030) Background Intersection Configuration and LOS

The intersection operations in the AM and PM peak hours are shown in Table 5 and Table 6, Respectively.

Table 5. Buildout (2030) Background Intersection Operations (AM Peak Hour)**Intersection Analysis Summary**

ID	Intersection Name	Control Type	Method	Worst Mvmt	V/C	Delay (s/veh)	LOS
1	Marksheffel Rd/Fontaine Bl	Signalized	HCM 7th Edition	WB Left	0.692	36.7	D
2	Marksheffel Rd/Lorson Bl	Signalized	HCM 7th Edition	SB Left	0.703	17.1	B
3	Fontaine Bl/Carriage Meadows Dr	Two-way stop	HCM 7th Edition	NB Left	0.949	211.3	F

V/C, Delay, LOS: For two-way stop, these values are taken from the movement with the worst (highest) delay value. For all other control types, they are taken for the whole intersection.

Table 6. Buildout (2030) Background Intersection Operations (PM Peak Hour)**Intersection Analysis Summary**

ID	Intersection Name	Control Type	Method	Worst Mvmt	V/C	Delay (s/veh)	LOS
1	Marksheffel Rd/Fontaine Bl	Signalized	HCM 7th Edition	EB Left	0.810	45.1	D
2	Marksheffel Rd/Lorson Bl	Signalized	HCM 7th Edition	SB Left	0.647	14.9	B
3	Fontaine Bl/Carriage Meadows Dr	Two-way stop	HCM 7th Edition	NB Left	47.294	10,000.0	F

V/C, Delay, LOS: For two-way stop, these values are taken from the movement with the worst (highest) delay value all other control types, they are taken for the whole intersection.

Please explain this value

As shown in Table 5 and Table 6, the intersection operates at an acceptable LOS, except for the intersection at Fontaine Boulevard/Carriage Meadows Drive. The intersection operates at LOS F during both AM and PM peak hour. The queue length for the northbound through movement in PM peak hour is approximately 6 vehicles. Since a traffic signal is not warranted in the background conditions, Matrix recommends prohibiting northbound left-turn and southbound left-turn at this intersection. The intersection will still operate at LOS F (due to deficient northbound through and southbound through movements), however, the queue length will be no more than 1.47 vehicles. Figure 18, and Figure 19, show the traffic volumes in the mitigated scenarios. These prohibited left-turn volumes are now right-turns at adjacent intersections. These volumes are included as U-turns at adjacent intersections.

An explanation has been added.

operate at an acceptable LOS, except for the intersection at LOS F during both AM and PM peak hour.

Understood.
Discussion removed.

through volumes at Fontaine Boulevard/Carriage Meadows Drive intersection intersections operate at an acceptable LOS in the buildout year without the project. All approaches also operate at acceptable LOS for the intersections along Marksheffel Road that are owned and maintained by the City of Colorado Springs.

This condition of prohibiting the left turns will not be allowed.
Please revise the figures accordingly.

Figure 18. Mitigated - Buildout (2030) Background Traffic Volumes (AM Peak Hour)

Not Required													

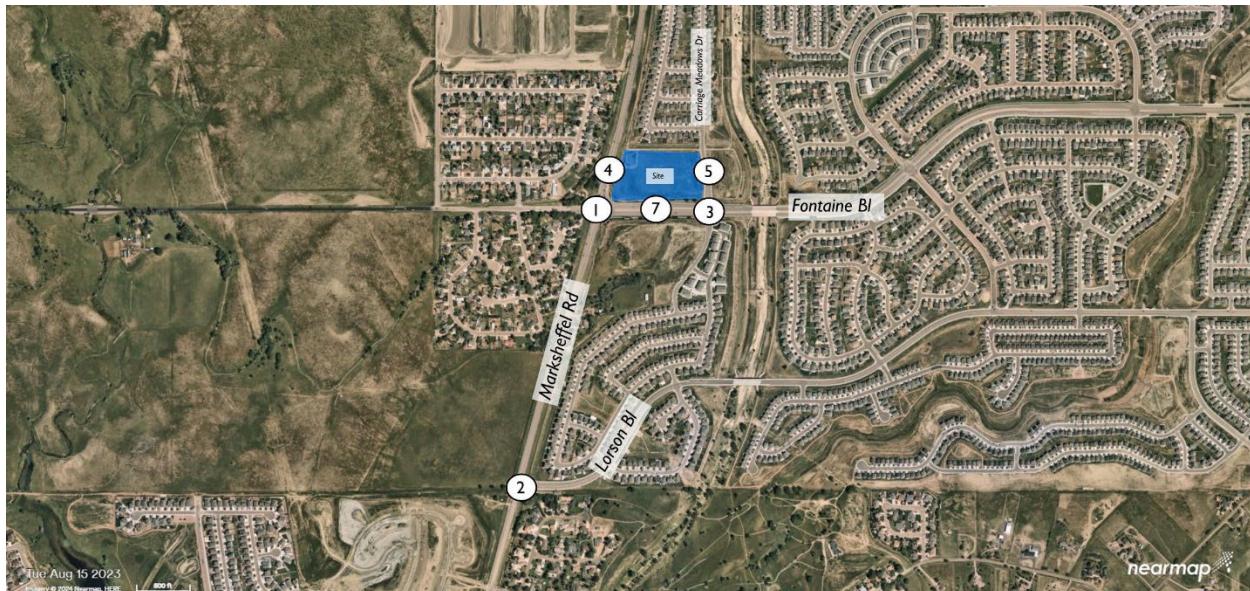

Fontaine Boulevard/Carriage Meadows Drive (#3)

- Prohibit northbound left-turn and southbound left-turn
- A 55-ft extension of northbound right-turn.
- A 135-ft extension of southbound right-turn.
- A 10-ft extension of eastbound left-turn.

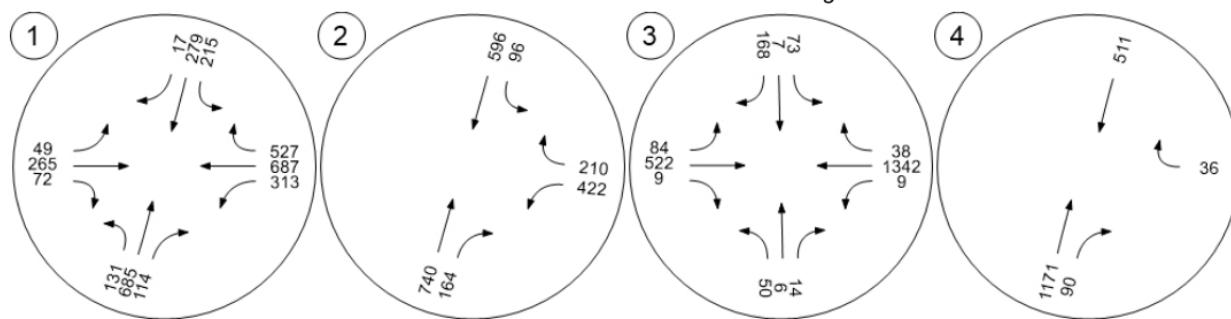

Buildout (2030) Total Conditions

Buildout total traffic volumes are shown in Figure 21 and Figure 22 for the AM and PM peak hours, respectively. Daily volumes and roadway classification are shown in Figure 23.

Fontaine Boulevard/Carriage Meadows Drive (#3)

- A Traffic Signal.
- A 95-extension of northbound left-turn.
- A 210-ft extension of southbound left-turn lane.
- A 90-ft extension of eastbound left-turn lane.
- An 85-ft extension of southbound right-turn lane. This intersection also requires an extension of the northwest curb return to protect the westbound deceleration lane into the project driveway along Fontaine Boulevard.

Marksheffel Road/West Driveway (#4)

- A 485-ft northbound right-turn lane. Included a 265-ft of deceleration lane, and a 220-ft taper lane.

Carriage Meadows/East Driveway (#5)

- A 335-ft northbound left-turn. Included a 115-ft deceleration lane, 120-ft taper lane, and a 100-ft storage lane.
- A 235-ft eastbound right-turn lane. Included a 115-ft deceleration lane, and a 120-ft taper lane.

Fontaine Boulevard/Middle Driveway (#7)

- A 435-ft westbound right-turn. Matrix recommends an extension of the northwest corner of the Fontaine/Carriage Meadows intersection to define the deceleration lane into the driveway along Fontaine Boulevard according to the Figure 2. A higher quality of this exhibit is provided in Appendix F – Supporting Documents.

Horizon (2045) Background Conditions

The horizon year traffic volumes without the Village at Lorson Ranch project in AM and PM peak hours are shown in Figure 25, and Figure 26, respectively. The daily volumes and roadway classification are shown in Figure 27. The background volumes were obtained from *The Hillside at Lorson Ranch* (2022) TIS. The traffic from the LRCS is also added to the horizon background conditions.

Figure 25. Horizon (2045) Background Traffic Volumes (AM Peak Hour)

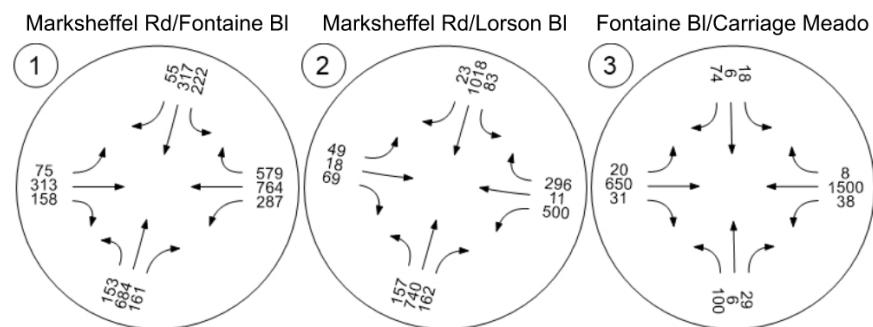

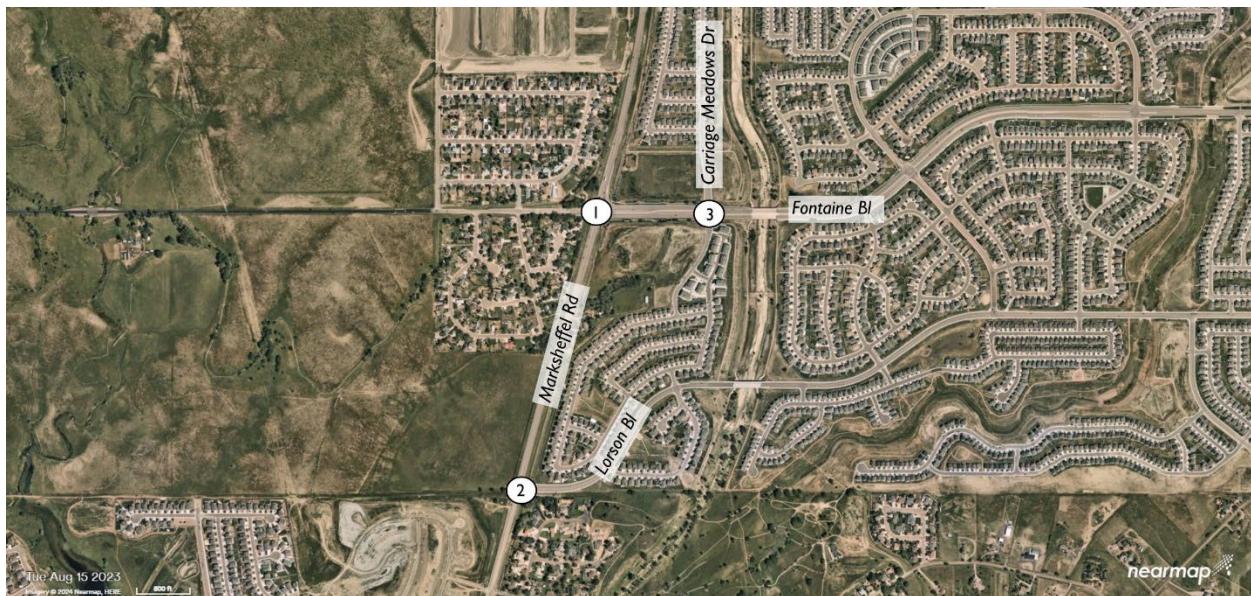

Figure 26. Horizon (2045) Background Traffic Volumes (PM Peak Hour)

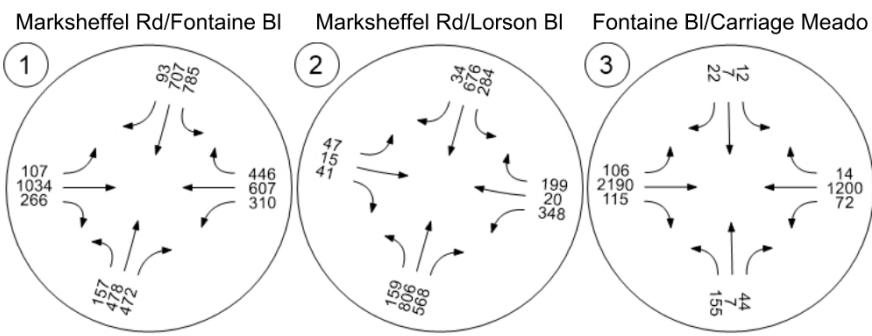

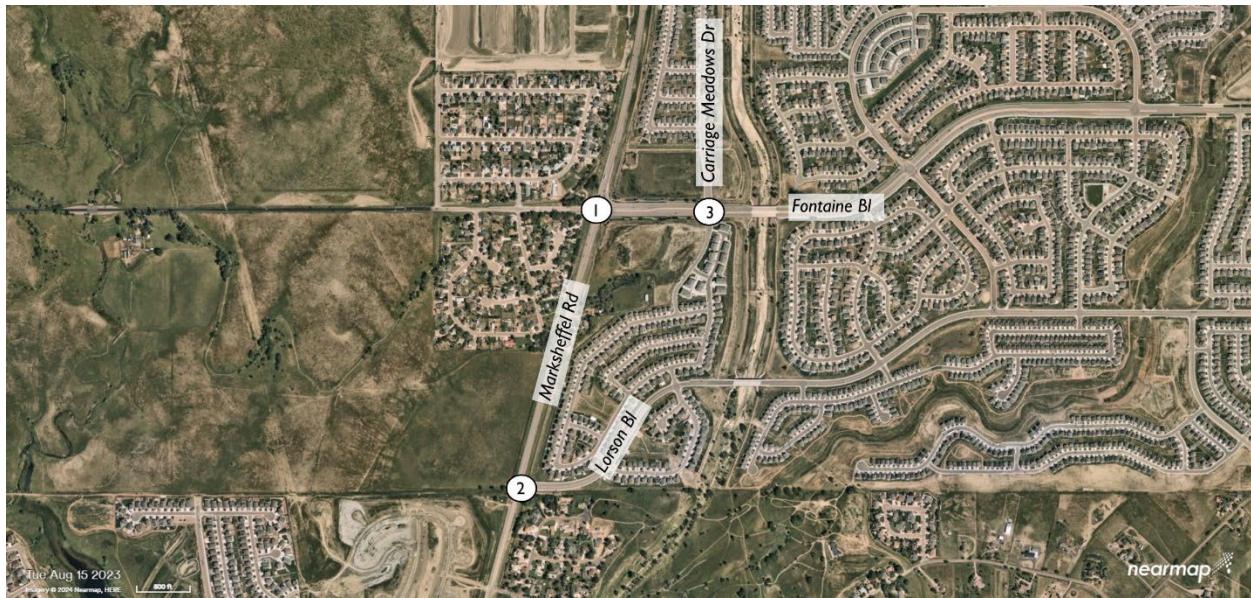

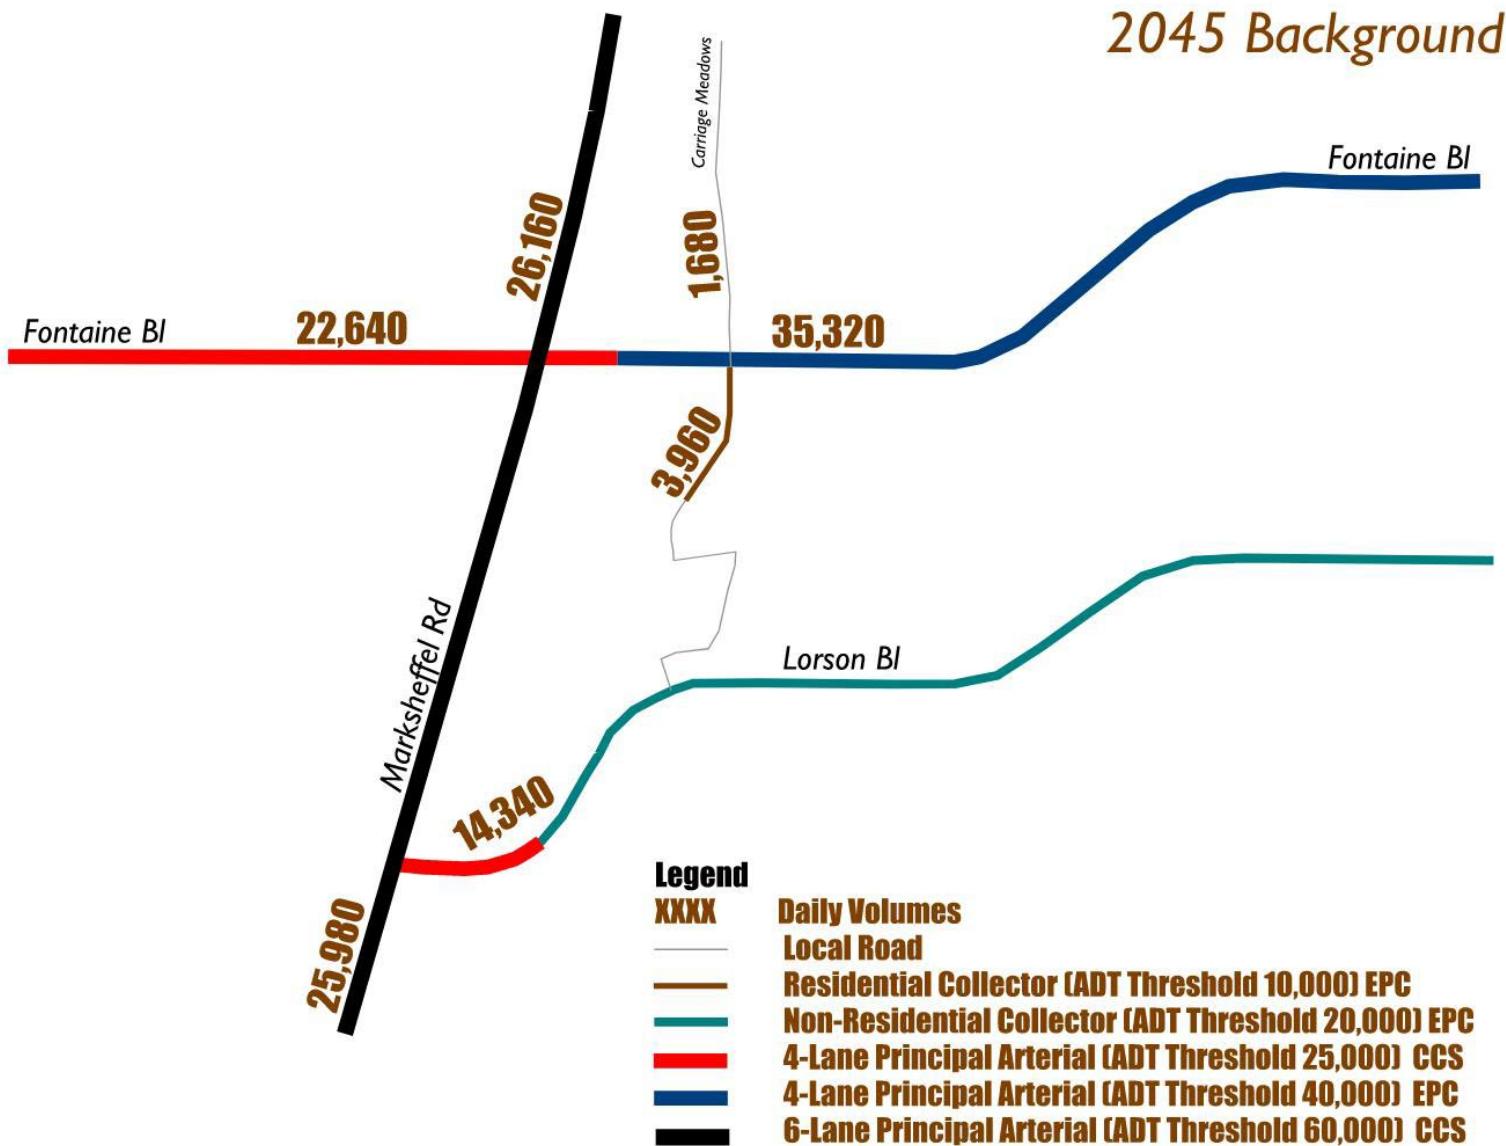

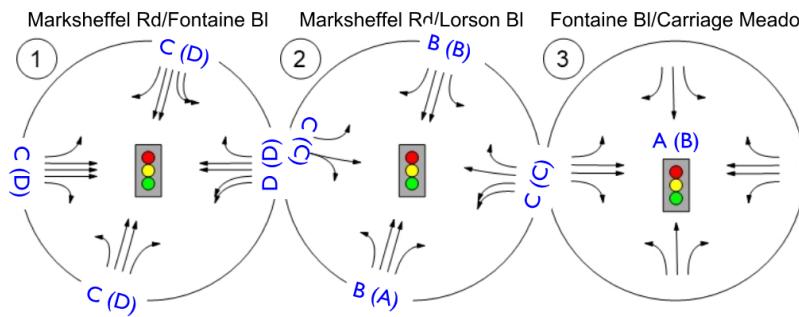

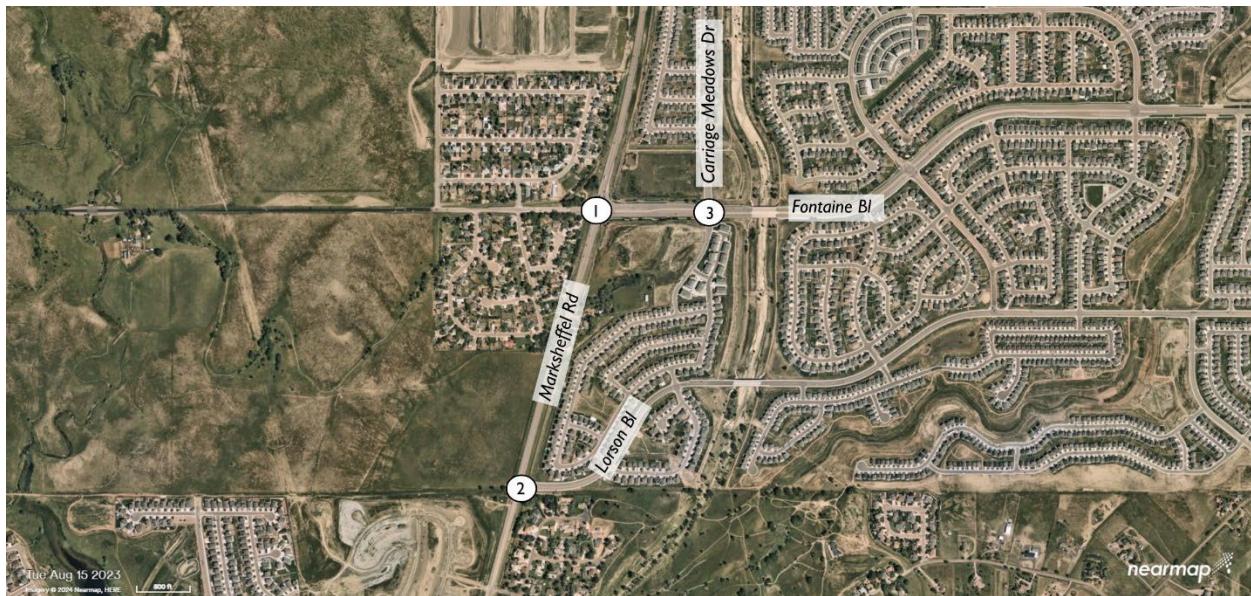

Figure 27. Horizon (2045) Background Daily Volume and Roadway Classification

The intersection configurations and level of service are shown in Figure 28.

Fontaine Boulevard/Carriage Meadows Drive (#3)

- A 75-ft extension of eastbound left-turn

Conclusions and Recommendations

In this report, the traffic impact of Village at Lorson Ranch on the adjacent roadways was studied. The *Hillside at Lorson Ranch (2022)* study was used to derive the background volumes in the future conditions. Two adjacent developments, namely townhomes at the northeast corner of Fontaine Boulevard/Carriage Meadows Drive and Lorson Ranch Commercial South traffic were also added to the background traffic. Summary of the required improvements are as follow:

Existing Conditions:

Marksheffel Road/Fontaine Boulevard (#1)

- A 210-ft extension of eastbound right-turn.

Marksheffel Road/Lorson Boulevard (#2)

- A Traffic Signal.

Buildout (2030) Background:

Fontaine Boulevard/Carriage Meadows Drive (#3)

- Prohibit northbound left-turn and southbound left-turn. A 55-ft extension of northbound right-turn.
- A 135-ft extension of southbound right-turn.
- A 10-ft extension of eastbound left-turn.

EPC will not approve
this solution

Buildout (2030) Total:

Fontaine Boulevard/Carriage Meadows Drive (#3)

Removed.

- A traffic signal.
- A 95-ft extension of northbound left-turn.
- A 210-ft extension of southbound left-turn lane.
- A 90-ft extension of eastbound left-turn lane.
- An 85-ft extension of southbound right-turn lane. Upon the buildout year the southbound right-turn needs to be a continuous lane from the east driveway (#5)

Marksheffel Road/West Driveway (#4)

- A 485-ft northbound right-turn lane. Included a 265-ft deceleration lane, and a 220-ft taper lane. The project is fully responsible for this improvement.

Carriage Meadows Drive/East Driveway (#5)

- A 335-ft northbound left-turn. Included a 115-ft deceleration lane, 120-ft taper lane, and a 100-ft storage lane. The project is fully responsible for this improvement.

- A 235-ft shared eastbound right-turn lane. Included a 115-ft deceleration lane, and a 120-ft taper lane. The project is fully responsible for this improvement.

Fontaine Boulevard/Middle Driveway (#7)

- A 435-ft westbound right-turn. Matrix recommends an extension of the northwest corner of the Fontaine/Carriage Meadows intersection to define the deceleration lane into the driveway along Fontaine Boulevard according to the Figure 2. A higher quality of this exhibit is provided in Appendix F – Supporting Documents. The project is fully responsible for this improvement.

Horizon (2045) Background:

Fontaine Boulevard/Carriage Meadows Drive (#3)

- A 325-ft extension of northbound left-turn.
- A 65-ft extension of southbound right-turn.
- A 115-ft extension of eastbound left-turn.
- A 90-ft extension of westbound left-turn.

Horizon (2045) Total:

Fontaine Boulevard/Carriage Meadows Drive (#3)

- A 75-ft extension of eastbound left-turn

The project fair share is summarized in Table 19.

Table 19. Village at Lorson Ranch Fair Share Calculations

ID	Intersection	2030 Total AM	2030 Total PM	2045 Total AM	2045 Total PM	Site AM	Site PM	Existing AM	Existing PM	Fairshare 2030 AM	Fairshare 2030 PM	Fairshare (Weighted Average)	Fairshare 2045 AM	Fairshare 2045 PM	Fairshare 2045 (Weighted Average)

Finally, the applicant is required to pay road impact fees to El Paso County. The County allows for the applicant to pay three different upfront fee amounts. The applicant can either pay the full fee amount, a smaller upfront fee to the 5 mill Public Improvement District (PID), or an even smaller upfront fee amount to the 10 mill PID. The different fee amounts are shown in Table 20. The applicant will choose which fee method to follow at a later date. If the applicant chooses one of the PIDs, the PID will collect taxes over time. Table 20 summarizes the road impact fees.

Table 20. Road Impact Fee Schedule

Land Use		Unit	Size	Full Fee	5 Mill PID	10 Mill PID
Day Care	General Commercial	ksf	12	\$59,496	\$46,212	\$32,940

Table 21. Summary of Required Improvements

ID	Intersection	Improvement	Year	Responsibility
1	Marksheffel Road/Fontaine Boulevard	A 210-ft extension of eastbound right turn	Existing	The Project has no responsibility for this improvement.
2	Marksheffel Road/Lorson Boulevard	Traffic Signal	Existing	The Project has no responsibility for this improvement.
3	Fontaine Boulevard/Carriage Meadows Drive	Prohibit northbound left-turn and southbound left-turn. A 55-ft extension of northbound right-turn. A 135-ft extension of southbound right-turn. A 10-ft extension of eastbound left-turn.	Buildout (2030) Background	The Project has no responsibility for these improvements.
3	Fontaine Boulevard/Carriage Meadows Drive	A traffic signal. A 95-ft extension of northbound left-turn. A 210-ft extension of southbound left-turn lane. A 90-ft extension of eastbound left-turn lane. An 85-ft extension of southbound right-turn lane. Upon the buildout year the southbound right-turn needs to be a continuous lane from the east driveway (#5)	Buildout (2030) Total	The Project fairshare is shown in Table 20.
4	Marksheffel Road/West Driveway	A 485-ft northbound right-turn lane. Included a 265-ft deceleration lane, and a 220-ft taper lane	Buildout (2030) Total	The project is fully responsible for this improvement.
5	Carriage Meadows Drive/East Driveway	A 335-ft northbound left-turn. Included a 115-ft deceleration lane, 120-ft taper lane, and a 100-ft storage lane. A 235-ft eastbound right-turn lane. Included a 115-ft deceleration lane, and a 120-ft taper lane.	Buildout (2030) Total	The project is fully responsible for this improvement.
7	Fontaine Boulevard/Middle Driveway (#7)	A 435-ft westbound right-turn	Buildout (2030) Total	The project is fully responsible for this improvement.
3	Fontaine Boulevard/Carriage Meadows Drive	A 325-ft extension of northbound left-turn. A 65-ft extension of southbound right-turn. A 115-ft extension of eastbound left-turn. A 90-ft extension of westbound left-turn.	Horizon (2045) Background	The Project has no responsibility for these improvements.
3	Fontaine Boulevard/Carriage Meadows Drive	A 75-ft extension of eastbound left-turn	Horizon (2045) Total	The Project fairshare is shown in Table 20.
