

FIRE PROTECTION REPORT

Date: 9/16/2020

RE: 7615 McLaughlin Road Plat Amendment

The above-referenced property is located within the jurisdiction and boundaries of the Falcon Fire Protection District ("Fire Department"). Falcon fire is a career fire department staffed with three full time stations and two part time stations. FFPD has an iso protection class rating of 3 district wide. FFPD has 56 full time and 12 part time members. FFPD responds to 3200 alarms per year with an average response time of 8 minutes district wide. The nearest station to the above referenced project location will have an average response time of 4 minutes.

When responding to a call, each engine carries a minimum of two firefighters. Since most responses are related to medical issues, we respond with one Falcon Fire Department apparatus. When available, an AMR ambulance is posted at Falcon Fire Station 1 to minimize response times for advanced life support to the busiest areas of the fire district. This ambulance is not dedicated to Falcon. It also responds to other areas of the county, and frequently into the City of Colorado Springs. The AMR ambulance is staffed 24/7 by an AMR Paramedic and an AMR Emergency Medical Technician (EMT). The fire district does not pay for this service, nor does it receive revenue from AMR. A minimum of two engines, four firefighters, and a chief officer respond to fire calls.

The Department operates from five stations for the protection of our citizens and businesses.

- Station 1, at Meridian Ranch Boulevard and Stapleton Road, is staffed 24/7.
- Station 2, on North Meridian Road in the north end of the District, is not staffed.
- Station 3/Headquarters, on Old Meridian Road and Highway 24, is staffed 24/7.
- Station 4, on Capital Drive north of Constitution Avenue, is staffed 24/7.
- Station 6, on Jones Road in the east end of the District, is not staffed.

How many firefighting apparatuses are in the Falcon F.D. fleet?

- 3 fire engines
- 1 four-wheel-drive engine
- 1 pumper/tender
- 4 water tenders
- 4 brush trucks
- 2 Quick Response Vehicles (QRVs)
- 2 utility trucks
- 1 command vehicle
