

Determination of Water Rights

For

Williams Creek Generating Station

Williams Creek Generating Station

Determination of Water Rights

The water rights listed in the table below were evaluated as part of the Southern Delivery System (SDS) Final Environmental Impact Statement and associated Record of Decision issued by the Bureau of Reclamation (Reclamation) for delivery through SDS. Colorado Springs Utilities may, subject to Reclamation approval, utilize additional water supply types through SDS in the future.

Decree No.	Name	Description	Amount	Type	Approximate Geographic Extent (e)
1. Div. 2, 84CW203	Colorado Springs Arkansas River Exchange (sewered phase)	Exchange of Colorado Springs' sewered reusable return flows within the Arkansas River Basin	164 [1,000 (a)] cfs	Exchange of transmountain or consumptive use water	From Colorado Springs on Fountain Creek to the Arkansas River and points upstream of Pueblo Reservoir including Otero Pump Station Intake, Twin Lakes, and Turquoise Reservoirs, South Slope System, Clear Creek Reservoir, and the Rosemont System
2. Div. 2, 84CW202, 84CW203, 86CW118 (B), and 89CW036	Colorado Springs' Arkansas River exchange (non-sewered phase)	Exchange of Colorado Springs' non-sewered reusable return flows within the Arkansas River Basin and Groundwater Augmentation Plan	17 [1,000 (a)] cfs	Exchange of transmountain or consumptive use water	From Colorado Springs on Fountain Creek to the Arkansas River and points upstream of Pueblo Reservoir including Otero Pump Station Intake, Twin Lakes, and Turquoise Reservoirs
3. Div 2, 84CW62, 63, & 64	Colorado Canal Companies (Colorado Canal, Lake Henry, Lake	Exchange of Colorado Springs' pro rata ownership of transferred Colorado Canal	Constrained by available exchange potential and release rate from	Change and exchange of consumptive use water	From Lake Meredith Outlet near Rocky Ford to points upstream of Pueblo Reservoir including Twin Lakes, and Turquoise Reservoirs

	Meredith) change of water rights and consumptive use exchange	Companies' shares	Lake Meredith or 756 cfs		
4. Div. 2, 86CW118 (A)	Colorado Canal Companies (Colorado Canal, Lake Henry, Lake Meredith) reuseable return flow exchange – sewered phase	Exchange of Colorado Springs reusable return flows from transferred Colorado Canal Companies' share	164 [1,000 (a)] cfs	Change and exchange of consumptive use water	From Fountain Creek (from storage in Terminal Reservoir) including Pueblo Reservoir, Otero Pump Station Intake, Twin Lakes, and Turquoise Reservoirs
5. Civil Action No. 4613 and W-829-76	Fryingpan- Arkansas Project Decrees	Decrees for Fryingpan- Arkansas Project Water	According to Allocation Principles. Purchased Fry- Ark Return Flows may be exchanged under Fry-Ark Decrees or Under No. 1 and No. 2 above	Fryingpan River to the upper Arkansas River Basin and native east slope waters	Headwaters of the Fryingpan and Arkansas Rivers to Project Storage including Pueblo, Twin Lakes, and Turquoise Reservoirs

Secondary Sources of Supply					
6. 1936 Decree No. 284, W-1901 & Div. 5, 84CW162	Independence Pass Transmountain Diversion System (Twin Lakes Reservoir and Canal Company) Decrees	Decrees for Colorado Springs' Shares in the Twin Lakes Reservoir and Canal Company	11,283 acre-feet & 18,475 acre-feet (b)	Trans-mountain imports from the Roaring Fork River to the upper Arkansas River Basin	Headwaters of the Roaring Fork and Arkansas River to east slope storage including Pueblo, Twin Lakes, and Turquoise Reservoirs, Northslope and Rampart Reservoirs
7. Supreme Court Case No. 18855, Civil Action No. 1193	Homestake Project Decrees	Decrees for Homestake Project Water Delivered through Turquoise Reservoir	700 cfs /126,844 acre-feet (c)	Trans-mountain imports from the Eagle River to the upper Arkansas River Basin	Headwaters of the Eagle River and Homestake Creek to east slope storage including Pueblo, Twin Lakes, Turquoise Reservoirs, Northslope and Rampart Reservoirs
8. Div. 2, 86CW117	CF&I Water Rights	Transfer case for use of purchased CF&I Water Rights in the Arkansas River and Turquoise Reservoir including Colorado Gulch Placer	17,372 acre-feet (d)	Change Native Arkansas Water Rights	Headwaters of the Arkansas River and Turquoise Reservoir to other east slope storage including Pueblo, Twin Lakes, Northslope, and Rampart Reservoirs

(a) Maximum Rate of Exchange from Fountain Ck. Terminal Storage into Pueblo Reservoir or other decreed storage locations

(b) Twin Lakes Reservoir Storage Decrees

(c) Decreed Homestake Tunnel Flow Limitation and Homestake Reservoir Storage Decree

(d) CF&I Sugarloaf Reservoir Storage Decree

Notes:

- (1) Legal limitations of use are described in the terms and conditions of the respective decrees and administered according to the priority system by the Division 2 Engineer. The rights have been decreed by original intent or through change of water rights proceedings for the municipal purposes including residential, commercial, industrial, and irrigation uses within the respective party's service areas.
