## **GRADING AND EROSION CONTROL PLAN CHECKLIST**

PPR-21-020

	PPR-21-020	A 1° .	DCD
1. <u>G</u> I	Revised: July 2019  RADING AND EROSION CONTROL PLAN	Applicant	PCD
<u> </u>	Vicinity map.	X	Υ
b	Adjacent city/town/jurisdictional boundaries, subdivision names, and property parcel numbers labeled.	X	Υ
С	North arrow and acceptable scale (1"=20' to 1"=100').	X	Y
d	Legend for all symbols used in the plan.	X	Y
е	Existing and proposed property lines. Proposed subdivision boundary for subdivision projects.	X	<u>.</u> Ү
f	All existing structures.		N/A
		N/A	
g	All existing utilities.	X	Y
h	Construction site boundaries.	X	Y
i	Existing vegetation (notes are acceptable in cases where there is no notable vegetation, only grasses/weeds, or site has already been stripped).	X	Y
j	FEMA 100-yr floodplain.	X	N
k	Existing and proposed water courses including springs, streams, wetlands, detention ponds, stormwater quality structures, roadside ditches, irrigation ditches and other water surfaces. Show maintenance of pre-existing vegetation within 50 feet of a receiving water.	X	Y
I	Existing and proposed contours 2 feet or less (except for hillside).	X	Υ
m	Limits of disturbance delineating all anticipated areas of soil disturbance.	X	Υ
n	Identify and protect areas outside of the construction site boundary with existing fencing, construction fencing or other methods as appropriate.	X	Υ
0	Offsite grading clearly shown and called out.	X	Υ
р	Areas of cut and fill identified.	X	Y
q	Conclusions from soils/geotechnical report and geologic hazards report incorporated in grading design (slopes, embankments, materials, mitigation, etc.)	X	Υ
r	Proposed slopes steeper than 3:1 with top and toe of slope delineated. Erosion control blanketing or other protective covering required.	X	Y
s	Stormwater flow direction arrows.	X	Y
t	Location of any dedicated asphalt / concrete batch plants.	N/A	N/A
u	Areas used for staging, storage of building materials, soils (stockpiles) or wastes. The use of construction office trailers requires PCD permitting.	X	Υ
٧	All proposed temporary construction control measures, structural and non-structural. Temporary construction control measures shall be identified by phase of implementation to include" "initial," "interim," and "final" or shown on separate phased maps identifying each phase.	X	Y
W	Vehicle tracking provided at all construction entrances/exits. Construction fencing, barricades, and/or signage provided at access points not to be used for construction.	X	Υ
Х	Temporary sediment ponds provided for disturbed drainage areas greater than 1 acre. See note on C11	N/A	
у	Dewatering operations to include locations of diversion, pump and discharge(s) as anticipated at time of design	N/A	N/A
Z	All proposed temporary construction control measure details. Custom or other jurisdiction's details used must meet or exceed EPC standards.	X	Υ
aa	Any offsite stormwater control measure proposed for use by the project and not under the direct control or ownership of the Owner or Operator.	N/A	N/A

# EL PASO COUNTY PLANNING AND COMMUNITY DEVELOPMENT DEPARTMENT

	Revised: July 2019	Applicant	PCD
bb	Existing and proposed permanent storm water management facilities, including areas proposed for stormwater infiltration or subsurface detention.	X	Y
СС	Existing and proposed easements (permanent and construction) including required off site easements.	X	Υ
dd	Retaining walls (not to be located in County ROW unless approved via license agreement). Design by P.E. and building permit from Regional Building Department required for walls greater than or equal to 4 feet in height, series of walls, or walls supporting a surcharge.	N/A	N/A
ee	Plan certified by a Colorado Registered P.E., with EPC standard signature blocks for Engineer, Owner and	X	Υ
ff	Engineer's Statement (for standalone GEC Plan): This Grading and Erosion Control Plan was prepared under my direction and supervision and is correct to the best of my knowledge and belief. Said Plan has been prepared according to the criteria established by the County for Grading and Erosion Control Plans. I accept responsibility for any liability caused by any negligent acts, errors or omissions on my part in preparing this plan.  Engineer of Record Signature  Date	X	Y
gg	Engineer's Statement (for GEC Plan within Construction Drawing set):  These detailed plans and specifications were prepared under my direction and supervision. Said plans and specifications have been prepared according to the criteria established by the County for detailed roadway, drainage, grading and erosion control plans and specifications, and said plans and specifications are in conformity with applicable master drainage plans and master transportation plans. Said plans and specifications meet the purposes for which the particular roadway and drainage facilities are designed and are correct to the best of my knowledge and belief. I accept responsibility for any liability caused by any negligent acts, errors or omissions on my part in preparation of these detailed plans and specifications.  Engineer of Record Signature  Date	N/A	N/A
hh	I, the owner/developer have read and will comply with the requirements of the Grading and Erosion Control Plan.  Owner Signature  Date	Х	Y
ii	Owner's Statement (for GEC Plan within Construction Drawing set):  I, the owner/developer have read and will comply with the requirements of the grading and erosion control plan and all of the requirements specified in these detailed plans and specifications.  Owner Signature  Date	N/A	N/A

k	Conditions of Approval met?	N/A	

# EL PASO COUNTY PLANNING AND COMMUNITY DEVELOPMENT DEPARTMENT

STANDARD NOTES FOR EL PASO COUNTY GRADING AND EROSION CONTROL PLANS  Stormwater discharges from construction sites shall not cause or threaten to cause pollution, contamination, or degradation of State Waters. All work and earth disturbance shall be done in a manner that minimizes pollution of any on-site or off-site waters, including wetlands.  Notwithstanding anything depicted in these plans in words or graphic representation, all design and construction related to roads, storm drainage and erosion control shall conform to the standards and requirements of the most recent version of the relevant adopted El Paso County standards, including the Land Development Code, the Engineering Criteria Manual, and the Drainage Criteria Manual Volume 2. Any deviations from regulations and standards must be requested, and A separate Stormwater Manager or Certified Erosion Control Inspector. The SWMP shall be located on stea at all times during construction and shall be kept up to date with work progress and changes in the field.  Once the ESQCP is approved and a "Notice to Proceed" has been issued, the contractor may install the initial stage erosion and sediment control measures as indicated on the approved GEC. A Preconstruction Meeting between the contractor, engineer, and El Paso County will be held prior to any construction. It is the responsibility of the applicant to coordinate the meeting time and place with County staff.  Control measures must be installed prior to commencement of activities that could contribute p		Revised: July 2019	Applicant	PCD
tontamination, or degradation of State Waters. All work and earth disturbance shall be done in a manner that minimizes pollution of any on-site or off-site waters, including wetlands.  Notwithstanding anything depicted in these plans in words or graphic representation, all design and construction related to roads, storm drainage and erosion control shall conform to the standards and requirements of the most recent version of the relevant adopted El Paso County standards, including the Land Development Code, the Engineering Criteria Manual, the Drainage Criteria Manual, and the Drainage Criteria Manual Volume 2. Any deviations from regulations and standards must be requested, and A separate Stormwater Management Plan (SMWP) for this project shall be completed and an Erosion and Stormwater Quality Control Permit (ESQCP) issued prior to commencing construction. Management of the SWMP during construction is the responsibility of the designated Qualified Stormwater Manager or Certified Erosion Control Inspector. The SWMP shall be located on site at all times during construction and shall be kept up to date with work progress and changes in the field.  Once the ESQCP is approved and a "Notice to Proceed" has been issued, the contractor may install the initial stage erosion and sediment control measures as indicated on the approved GEC. A Preconstruction Meeting between the contractor, engineer, and El Paso County will be held prior to any construction. It is the responsibility of the applicant to coordinate the meeting time and place with County staff.  Control measures must be installed prior to commencement of activities that could contribute pollutants to stormwater. control measures, channels, ditches, and disturbed land areas shall be installed immediately upon completion of the disturbance.  All temporary sediment and erosion control measures are implemented and final stabilization is established. All persons engaged in land disturbance activities shall assess the adequacy of control measures at the site and id	3. <u>S</u>	TANDARD NOTES FOR EL PASO COUNTY GRADING AND EROSION CONTROL PLANS		
hat minimizes pollution of any on-site or off-site waters, including wetlands.  Notwithstanding anything depicted in these plans in words or graphic representation, all design and construction related to roads, storm drainage and erosion control shall conform to the standards and requirements of the most recent version of the relevant adopted EI Paso County standards, including the Land Development Code, the Engineering Criteria Manual, the Drainage Criteria Manual, and the Drainage Criteria Manual Volume 2. Any deviations from regulations and standards must be requested, and A separate Stormwater Management Plan (SMWP) for this project shall be completed and an Erosion and Stormwater Quality Control Permit (ESQCP) is sused prior to commencing construction. Management of the SWMP during construction is the responsibility of the designated Qualified Stormwater Manager or Certified Erosion Control Inspector. The SWMP shall be located on site at all times during construction and shall be kept up to date with work progress and changes in the field.  Once the ESQCP is approved and a "Notice to Proceed" has been issued, the contractor may install the initial stage erosion and sediment control measures as indicated on the approved GEC. A Preconstruction Meeting between the contractor, engineer, and El Paso County will be held prior to any construction. It is the responsibility of the applicant to coordinate the meeting time and place with County staff.  Control measures must be installed prior to commencement of activities that could control to the stormwater. All temporary sediment and erosion control measures are implemented and final stabilization is established. All persons engaged in measures are implemented and final stabilization is established. All persons engaged in and disturbance activities shall assess the adequacy of control measures are needed to ensure the continued effective performance of the control measures are needed to ensure the continued effective performance of the control measures and stockpil		Stormwater discharges from construction sites shall not cause or threaten to cause pollution,

# EL PASO COUNTY PLANNING AND COMMUNITY DEVELOPMENT DEPARTMENT

	Revised: July 2019	Applicant	PCD
	Any temporary or permanent facility designed and constructed for the conveyance of stormwater around,		V
12	through, or from the earth disturbance area shall be a stabilized conveyance designed to minimize erosion	X	Ţ
	and the discharge of sediment off site.		
	Concrete wash water shall be contained and disposed of in accordance with the SWMP. No wash water		
13	shall be discharged to or allowed to enter State Waters, including any surface or subsurface storm	X	
13	drainage system or facilities. Concrete washouts shall not be located in an area where shallow	Λ	
	groundwater may be present, or within 50 feet of a surface water body, creek or stream.		
14	During dewatering operations of uncontaminated ground water may be discharged on site, but shall not		
17	leave the site in the form of surface runoff unless an approved State dewatering permit is in place.		
15	Erosion control blanketing or other protective covering shall be used on slopes steeper than 3:1.	X	
	Contractor shall be responsible for the removal of all wastes from the construction site for disposal in		
16	accordance with local and State regulatory requirements. No construction debris, tree slash, building	X	
	material wastes or unused building materials shall be buried, dumped, or discharged at the site.		
	Waste materials shall not be temporarily placed or stored in the street, alley, or other public way, unless in		
17	accordance with an approved Traffic Control Plan. control measures may be required by El Paso County	X	
	Engineering if deemed necessary, based on specific conditions and circumstances.		
18	Tracking of soils and construction debris off-site shall be minimized. Materials tracked off-site shall be	v	
10	cleaned up and properly disposed of immediately.	X	
	The owner/developer shall be responsible for the removal of all construction debris, dirt, trash, rock,		
19	sediment, soil, and sand that may accumulate in roads, storm drains and other drainage conveyance	X	
	systems and stormwater appurtenances as a result of site development.		
	The quantity of materials stored on the project site shall be limited, as much as practical, to that quantity		
20	required to perform the work in an orderly sequence. All materials stored on-site shall be stored in a neat,	X	
	orderly manner, in their original containers, with original manufacturer's labels.		
	No chemical(s) having the potential to be released in stormwater are to be stored or used onsite unless		
21	permission for the use of such chemical(s) is granted in writing by the ECM Administrator. In granting	X	
	approval for the use of such chemical(s), special conditions and monitoring may be required.		
	Bulk storage of allowed petroleum products or other allowed liquid chemicals in excess of 55 gallons shall		
22	require adequate secondary containment protection to contain all spills onsite and to prevent any spilled	X	
	materials from entering State Waters, any surface or subsurface storm drainage system or other facilities.		
23	No person shall cause the impediment of stormwater flow in the curb and gutter or ditch except with	X	
20	approved sediment control measures.	Λ	
	Owner/developer and their agents shall comply with the "Colorado Water Quality Control Act" (Title 25,		
	Article 8, CRS), and the "Clean Water Act" (33 USC 1344), in addition to the requirements of the Land		
24	Development Code, DCM Volume II and the ECM Appendix I. All appropriate permits must be obtained by	X	
27	the contractor prior to construction (1041, NPDES, Floodplain, 404, fugitive dust, etc.). In the event of	Λ	
	conflicts between these requirements and other laws, rules, or regulations of other Federal, State, local, or		
	County agencies, the most restrictive laws, rules, or regulations shall apply.		
25	All construction traffic must enter/exit the site only at approved construction access points.	X	
26	Prior to construction the permittee shall verify the location of existing utilities.	X	
27	A water source shall be available on site during earthwork operations and shall be utilized as required to	v	
27	minimize dust from earthwork equipment and wind.	X	
00	The soils report for this site has been prepared by <u>Vivid Engineering Group</u> and shall be considered a part	v	1
28	of these plans.	X	▼
