

Traffic Assessment

Diannes Dalhais is not a full retail operation. Most of the flowers will be sold to local florists. Any deliveries to the florist from the property will be done by ½ pick up and/or private passenger vehicle. The Western Mining Museum has various events at the Museum during the 2 month period that Dahlia plants will be producing blooms. This period is between 8/15 to 10/15. At these events people can purchase flower bouquets at an existing small building on the Museum property. So the activities of the business will not increase the normal traffic into the museum property.
