Dam I.D	Signature of Division Engine	
A "Non-Jurisdictional Structure" is a dam creating a reservoir with a capacity of 1	00 acre-feet or less and a surface area of 20 acres	or less and a vertical height (footnote 2)

of 10 feet or less. Non-jurisdictional size dams are regulated and subject to the authority of the State Engineer consistent with sections 37-87-102 and 37-87-105 C.R.S. ² "Vertical Height" is measured from the elevation of the lowest point of the natural surface of the ground or the invert of the outlet conduit (whichever is lower) where that point occurs along the longitudinal centerline of the dam up to the crest of the emergency spillway of the dam. ³ Freeboard" is the vertical distance from the bottom of spillway to the crest of the dam. Minimum Freeboard is 3 feet.

⁴ If construction in reservoir intercepts groundwater, a well permit is required. (Well permit applications can be found at <u>dwr.colorado.gov</u>)
