

### **Natural Gas Notice**

Viewpoint Estates Filing No. 2 will not be served by a central natural gas utility provider as the nearest natural gas network is located over 6 miles from the site. The future residents of Viewpoint Estates Filing No. 2 will have the option to utilize individual on-site propane tanks as do many residents of the adjacent established development. Additionally, all heating and cooking needs may be met using electricity which is to be provided by Mountain View Electric Association (MVEA), which has provided a letter of service commitment for the proposed subdivision.
