Engineer: Mike Bramlett Company Name: JR Engineering Mailing Address: 5475 Tech Center Dr, Ste 235, Colorado Springs Registration Number: 32314 Telephone Number: 719-593-2593 Explanation of Request (Attached diagrams, figures and other documentation to clarify request): Section of ECM from Which Deviation is Sought: Standard Drawings for Rural Local Roadways Specific Criteria from Which a Deviation: Applicant wishes to use the urban local centerline radius in 4 locations within the property as opposed to the rural local centerline radius of 300 ft. See Attachment 2 for ECM criteria for rural local centerline radius	Applicant: William Guman and Associates, Ltd. Email Address: bill@guman,net Applicant is: Owner Consultant x Contractor Mailing Address: 731 North Weber Street, Ste 10, Colorado Springs State: CO Postal Code: 80903
Telephone Number: 719-593-2593 Explanation of Request (Attached diagrams, figures and other documentation to clarify request): Section of ECM from Which Deviation is Sought: Standard Drawings for Rural Local Roadways Specific Criteria from Which a Deviation is Sought:: ECM criteria for minimum rural local centerline radius. Proposed Nature and Extent of Deviation: Applicant wishes to use the urban local centerline radius in 4 locations within the property as opposed to the rural local centerline radius of 300 ft. See Attachment 2 for ECM criteria for rural local centerline radius	Engineer: Mike Bramlett
Explanation of Request (Attached diagrams, figures and other documentation to clarify request): Section of ECM from Which Deviation is Sought: Standard Drawings for Rural Local Roadways Specific Criteria from Which a Deviation is Sought:: ECM criteria for minimum rural local centerline radius. Proposed Nature and Extent of Deviation: Applicant wishes to use the urban local centerline radius in 4 locations within the property as opposed to the rural local centerline radius of 300 ft. See Attachment 2 for ECM criteria for rural local centerline radius	
within the property as opposed to the rural local centerline radius of 300 ft. See Attachment 2 for ECM criteria for rural local centerline radius	Explanation of Request (Attached diagrams, figures and other documentation to clarify request): Section of ECM from Which Deviation is Sought: Standard Drawings for Rural Local Roadways
	within the property as opposed to the rural local centerline radius of 300 ft. See Attachment 2 for ECM criteria for rural local centerline radius
Reason for the Requested Deviation: Applicant believes the reduced radius is appropriate for the roadway geometry at the four locations requested.	
Comparison of Proposed Deviation to ECM Standard: See Attachment for impact of using minimum roadway centerline radius at proposed locations. The proposed deviation is a 200 ft. centerline radius as compared to the ECM standard radius of 300 ft. centerline radius.	centerline radius at proposed locations. The proposed deviation is a 200 ft. centerline radius as compared to the

El Paso County Procedures Manual Procedure # R-FM-051-07 Issue Date: 12/31/07

Revision Issued: 00/00/00

Applicable Regional or National centerline radius at the four loca		is: N/A, Propose using the urban local ECM criteria for
Application Consideration: CHECK IF APPLICATION MEE CONSIDERATION The ECM standard is inapplicabl situation.		JUSTIFICATION
x Topography, right-of-way, or of conditions or impediments imposon the applicant, and an equivale can accomplish the same design and does not compromise public accessibility.	e an undue hardship ent alternative that objective is available	In the four locations where the deviation is requested, the natural features of the site (floodplain constraints and nearby Curtis Road).lends itselfto the use of a "reduced radius" to create an efficient layout. Each area serves less than ten lots. Use of the required 300 ft. centerline radius would create the need for either excessively long flag lots or excessively large lots for the underlying R2.5 zoning
x A change to a standard is requispecific design or construction primodified, the standard will imposion the applicant with little or no republic.	oblem, and if not e an undue hardship	Use of standard radius curves would create excessively large lots in these specific areas or create the need for excessively long flag lots or create excessively large lots. If deviation granted applicant would reduce the posted speed from 30 mph (rural local) to 25 mph (urban local). The daily traffic volume on these streets is minimal, each location only serves 10 or less nearby lots.
Criteria for Approval:	OF THE FOLLOWINGThis request is not	this application for deviation cannot be considered. CRITERIA HAVE BEEN SATISFIED BY THIS REQUEST based on financial consideration, but rather the lack of a "in geometrical standards similar to ECM urban criteria.
The deviation will achieve the intended result with a comparable or superior design and quality of improvement.	This deviation achievapplicant believes excenterline radius.	ves a superior lot layout that improves the subdivision. The cessively long flag lots are less desirable than the reduced
The deviation will not adversely affect safety or operations.		on District (Trent Harwig) has accepted the originally out. Applicant can sign roadway to reduce speed to 25 MPH local speeds.
The deviation will not adversely affect maintenance and its associated cost.	Maintenance of the	roadway will not be affected
The deviation will not adversely affect aesthetic appearance.	The use of the redu	nced roadway radius does not adversely affect aesthetic ared to the use of excessively long flag lots.

2.3.3 **Horizontal Alignment**

A. General Criteria

Proper roadway alignment provides for safe and continuous operation at a uniform design speed. Proposed road layouts shall have a logical relationship to existing or platted roads and fit within the overall transportation plan.

² 330 feet when intersecting local roadways

³ 50-foot right-of-way plus two 5-foot Public Improvements Easements granted to El Paso County

⁴ Section can be used for cul-de-sacs, or roads with two ways out having a maximum of 300 ADT and a maximum length of 1,200 feet ⁵ Where no local public or private roadway can provide access, temporary or partial turn movement

parcel access may be permitted

Appendix B Transportation Impact Study Guidelines

Adopted: 12/23/2004 Revised: 12/13/2016

REVISION 6

Section B.3.2-B.3.2

transportation network to be studied. The analysis shall use procedures described in the Highway Capacity Manual. Factors for intersections will be by approach and those used for roadways will be by facility unless otherwise directed by the ECM Administrator.

1. Existing and Short-Range Horizon

Use calculated peak hour factors or 0.85, whichever is higher, and

2. Long-Range Horizon

A peak hour factor of 0.95 may be used for the Long-Range Horizon. Greater values may be used if approved by the ECM Administrator.

C. Roadway Links

Roadway links shall be analyzed. Acceptable maximum traffic volumes allowed for the specific class of roadway are shown in Table B-1.

Table B-1. Threshold Capacity

Facility Type	Lanes	ADT Threshold Capacity (Urban/Rural)
Local (low volume)/Local (rural)	2	300/750
Collector-Non-Residential	2	20,000
Local (urban)/Minor Collector (rural)	2	3,000/1,500
Major Collector	2	10,000/3,000
Minor Arterial	4	20,000/10,000
Principal Arterial (4-lane)	4	40,000/40,000
Principal Arterial (6-lane)	6	40,000/40,000
Expressway (4-lane)	4	48,000/48,000
Expressway (6-lane)	6	48,000/48,000

B.3.2 Background Traffic

A. Short-Range Volume Projections

The traffic forecast for the short-range planning horizon shall be the sum of existing traffic volumes plus cumulative development traffic from approved land use actions (projects with reserved intersection capacity established through a certified Full TIS), plus background growth (as adjusted to avoid duplicative consideration of the identified development traffic from the approved land use already considered). The cumulative development traffic shall be based, in part, on the A.M. and P.M. peak hour and (ADT) data established and accepted from planned and approved land use actions within and near the study area. The assumed baseline surface transportation network shall reflect existing facilities (without the proposed project improvements) plus any committed improvements within the study area.

The short-range planning horizon background traffic growth rate shall be based:
