Re: Banning Lewis Ranch - Village A1 – Filings 50, 51, 52, 53, 54, 55, 56

Ms. Wintz,

On behalf of Clayton Properties Group II, DBA Oakwood Homes Colorado Springs, we respectfully submit our Development Plan & Plats for Banning Lewis Ranch, Village A1, Filings 50, 51, 52, 53, 54, 55, 56. This submittal includes all required items as outlined in the Submittal Requirements Checklist. We have provided the following Project Statement narrative outlining the nature of the submittal.

Overview

The Oakwood Homes Village A1, located within the Banning Lewis Ranch community demonstrates on the PUD Concept Plan (CPC PUP 20-00125) a configuration for single-family residential and open space. This application for the Development Plan and Final Plats of Filings 50, 51, 52, 53, 54, 55, 56 represents the owner's next phase of development within the Banning Lewis Ranch Master Plan. This Development Plan application proposes 449 single-family lots on approximately 127.78 acres. These 7 filings are situated east of the future Banning Lewis Parkway, south of Dublin Blvd, and north of Stetson Hills Blvd.

Filings 50, 51, 52, 53, 54, 55, and 56 will feature three residential product types. The cluster product called the Carriage House that has been used in BLR, the Sterling Duet product that has been used within Village 3, and traditional single family homes on various lot sizes. Each unit has parking within a garage and guest parking is provided on the street. Village A1 stays within the Medium Density category approved on the PUD Concept Plan.

Parts of Village A1 include the streamside overlay zone. As a part of this Development Plan process, we are requesting a refinement to the streamside boundary. Currently the streamside zone for a Type 1 stream lies within an existing regional detention pond. Per discussions with city staff, we will be refining the boundary to follow the extends of this pond. There is also a section of Type 2 stream that requires engineering improvements. The boundary in this area will be refined to follow the final condition of the proposed stream alignment.

Development Plan Review Criteria

We have provided the following responses to the Development Plan review criteria provided in the Zoning and Subdivision code;

1. Will the project design be harmonious with the surrounding land uses and neighborhood?

Yes, the proposed Development Plan is consistent in nature with the surrounding land uses and does not pose any negative impacts on the ability of the overall BLR community to continue to develop in its approved framework.

2. Will the proposed land uses be compatible with the surrounding neighborhood? Will the proposed development overburden the capacities of existing streets, utilities, parks, schools and other public facilities?

Yes, the proposed Development Plan continues with residential use and is compatible with the surrounding neighborhood. The existing streets and utilities have been developed with this use in mind. There are multiple connections to walks that connect to existing amenities. This will ensure that the existing facilities in Villages 1, 2, and 3 are not overburdened.

3. Will the structures be located to minimize the impact of their use and bulk on adjacent properties?

Yes, the proposed housing units are located so as to ensure minimal impact upon neighboring properties by providing significant setbacks and buffering along the project boundaries.

4. Will landscaping, berms, fences and/or walls be provided to buffer the site from undesirable views, noise, lighting or other off site negative influences and to buffer adjacent properties from negative influences that may be created by the proposed development?

Yes, the Development Plan proposes buffering setbacks containing landscaping and walls or fencing to mitigate negative influences that may occur from bordering roadways.

5. Will vehicular access from the project to streets outside the project be combined, limited, located, designed and controlled to channel traffic to and from such areas conveniently and safely and in such a manner which minimizes traffic friction, noise and pollution and promotes free traffic flow without excessive interruption?

Yes, the proposed development will provide adequate circulation patterns and multiple points of ingress/egress to the neighborhood.

6. Will all the streets and drives provide logical, safe and convenient vehicular access to the facilities within the project?

Yes, the Development Plan proposes convenient access to all the facilities within the neighborhood. Additionally, the plan promotes safe pedestrian movement through the community via open space trail corridors and detached sidewalks along major roadways.

7. Will streets and drives within the project area be connected to streets outside the project area in such a way that discourages their use by through traffic?

Yes, the proposed streets are designed to limit the occurrence of through traffic from non-residents.

8. Will adequately sized parking areas be located throughout the project to provide safe and convenient access to specific facilities?

The Development Plan does not require parking areas given that the site consists entirely of single-family and two-family residences.

9. Will safe and convenient provision for the access and movement of handicapped persons and parking of vehicles for the handicapped be accommodated in the project design?

Yes, the proposed plan provides pedestrian access ramps at all pedestrian crossings in accordance with the City standard. The planned design does not require parking areas.

10. Will the design of streets, drives and parking areas within the project result in a minimum of area devoted to asphalt?

Yes, the proposed circulation design allows for an efficient use of land, requiring a minimal amount of paved area.

11. Will pedestrian walkways be functionally separated from vehicular traffic and landscaped to accomplish this? Will pedestrian walkways be designed and located in combination with other easements that are not used by motor vehicles?

Yes, the Development Plan proposes sidewalks and trails detached from roadways, along with providing landscape buffers adjacent to collector streets. The plan allows for several points of connection with the existing pedestrian walkway system.

12. Does the design encourage the preservation of significant natural features such as healthy vegetation, drainage channels, steep slopes and rock outcroppings? Are these significant natural features incorporated into the project design?

There are no existing significant natural features on this site.

We appreciate the City's cooperation so far in working with us to kick-off the next phase of this quality project, and we look forward to working with the City to complete this process in order to continue the successful legacy of the Banning Lewis Ranch master plan in Colorado Springs.

Sincerely,

COMMENTS: (This is a preliminary listing of issues and attention items; additional issues will likely surface as the application proceeds through the review process):

The applicant is proposing a PUD development plan for 127.8 acres of proposed BLR Village A with 5 concurrent final plat filings for an estimated 377 residential units. The overall development plan will also include additional improvements like landscaping, construction of public streets and refinement of an the streamside overlay on a portion of the overall site. The stream refinement request must be shown on the DP and supported by a professional survey. The applicant has coordinated with Tasha Brackin for site specific information required to consider this request.

A master plan amendment, zone change and concept plan are currently under review for this project site. Approval of those applications is required prior to approval of the DP & plats. The traffic report under review with the concept plan indicated that construction of 80 units will trigger the need to develop Banning Lewis Parkway from the intersection at Dublin to at least the northern entrance of the proposed development. Assurances may be required to be posted for the remaining portion of the parkway down to Stetson Hills and for portions of the extension of Stetson Hills to the easterly project site boundaries. A drainage report and land suitability analysis will be required.

Fees for this site are calculated and provided below. Please coordinate with me to create a dropbox folder when you are ready to submit the application.

NOTE: The above information is intended to assist in the preparation of an application. This sheet is not a complete list of submittal requirements. Refer to the Zoning and Subdivision Ordinances and the appropriate application checklists for further information and details.

This form and the information contained herein is valid for 6 months.
